6. MAINTENANCE

- **Cleaning:** Wipe the table surface with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, which can damage the engineered wood finish.
- **Spills:** Promptly clean up any spills to prevent staining or water damage.
- **Stability Check:** Periodically check all screws and fasteners to ensure they remain tight. Re-tighten if necessary to maintain stability.
- **Mechanism Care:** The lift mechanism is designed for durability. Avoid forcing it or applying excessive weight. Lubrication is generally not required, but if movement becomes stiff, a silicone-based lubricant can be applied sparingly to moving parts.
- **Sunlight Exposure:** Avoid prolonged exposure to direct sunlight, which can cause fading or warping of the wood finish.
