### HOMSHADE H19

# HOMSHADE Patio Umbrella Base Instruction Manual

Model: H19

## PRODUCT OVERVIEW

The HOMSHADE 4-Piece 423lbs Patio Umbrella Base is designed to provide a secure and stable foundation for your offset or cantilever patio umbrella. This heavy-duty base is refillable with water or sand, offering significant weight to withstand various weather conditions. Its durable construction and convenient features ensure long-lasting performance and ease of use.

# PERFECT FIT

423lbs Base Exclusively to Secure Offset Umbrellas

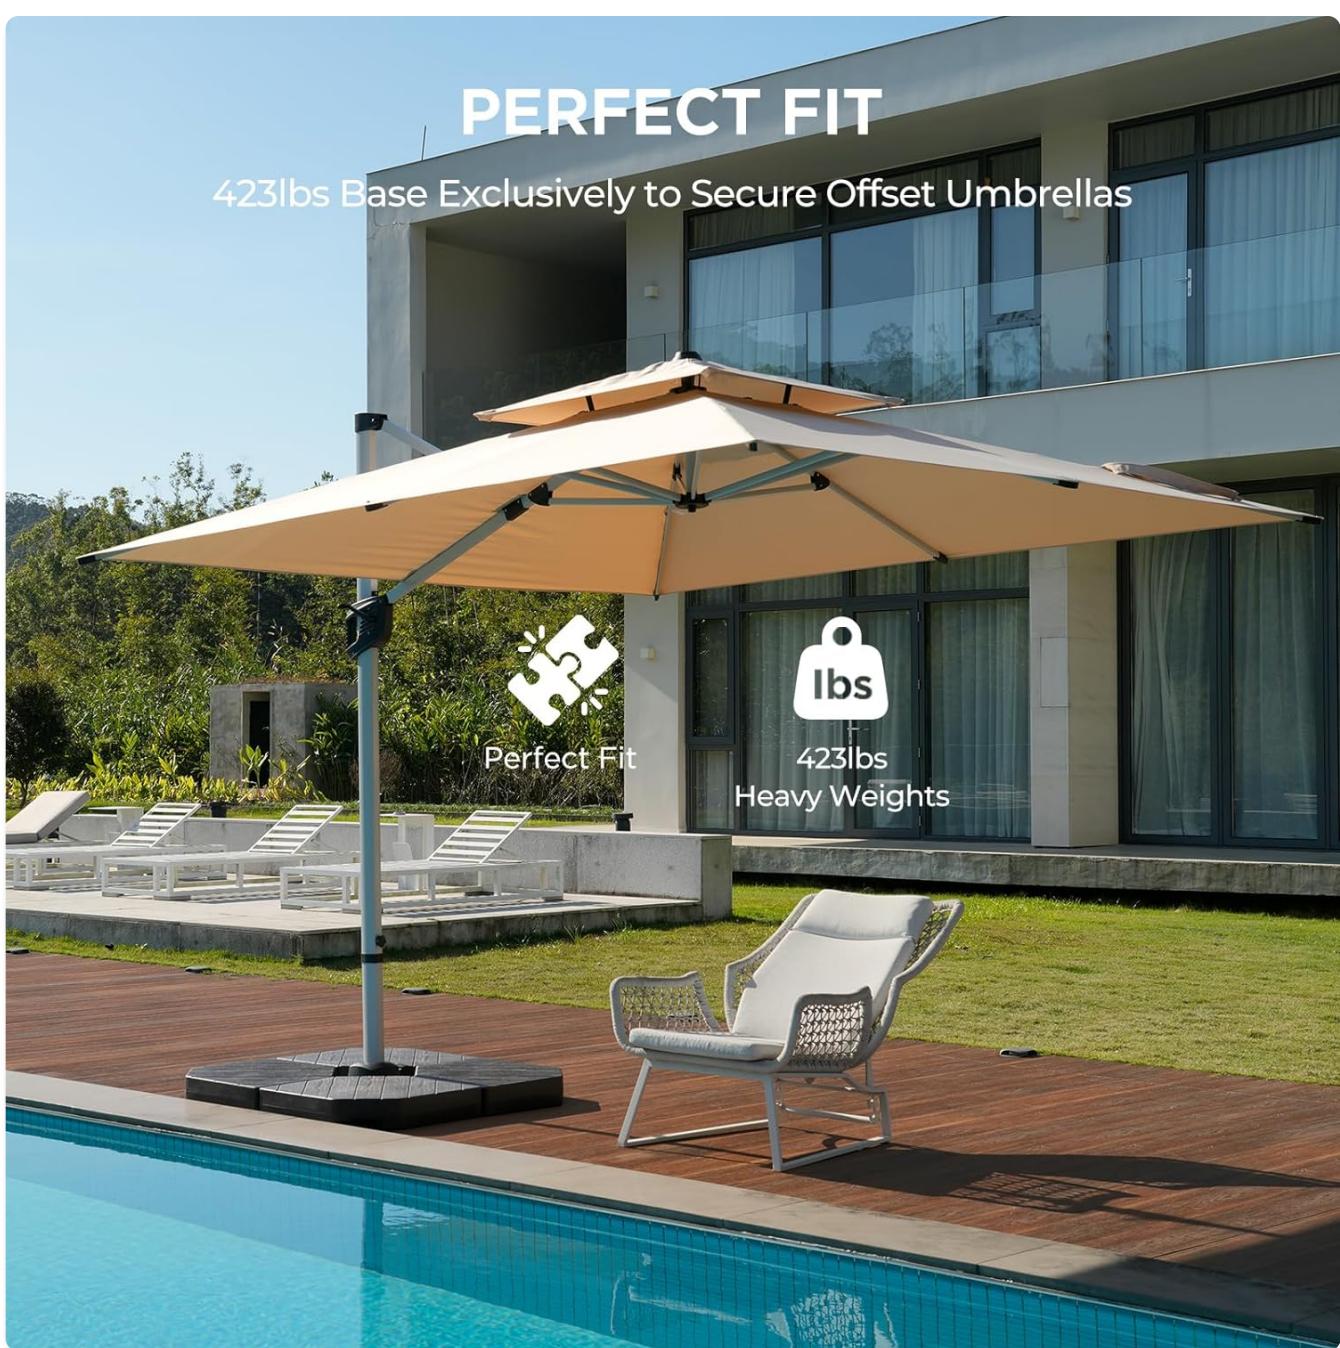

Image: A large cantilever umbrella demonstrating the secure fit and stability provided by the 423lbs base.

## KEY FEATURES

- Stable Fixation:** Consists of 4 sturdy plates, weighing up to 423 lbs when filled, providing a secure and stable stand for offset and cantilever umbrellas.
- Durable Material:** Constructed from heavy-duty, high-density HDPE plastic with UV- and wear-resistant coating for scratch-resistant and weather-resistant performance.
- Easy Set-Up:** Features manually openable fill spouts and twist caps for quick and easy refilling with water or sand.
- Stack and Store:** Plates can be emptied and stacked for convenient, space-saving storage.
- Convenient Design:** Built-in easy-grip handles facilitate movement and setup, even when the plates are filled.

## SETUP INSTRUCTIONS

Follow these steps to properly set up your HOMSHADE Patio Umbrella Base:

- 1. Position the Base:** Place the four base plates around the crossbar base of your offset or cantilever umbrella. Ensure the central opening aligns with the umbrella pole.
- 2. Fill the Plates:** Each plate features a fill spout. Unscrew the twist cap on each plate. You can fill the plates with either water or sand.
  - For water filling, the base will weigh approximately 220.5 lbs.
  - For sand filling, the base will weigh approximately 352.7 lbs.
  - For wet sand filling, the base will weigh approximately 423 lbs.

Image: Demonstrating the process of filling the base plate with water for stability.

- 3. Secure the Caps:** Once filled, securely twist the caps back onto the fill spouts to create a watertight seal and prevent leakage.
- 4. Check Compatibility:** Ensure your umbrella pole's screw distance is approximately 4.53 inches to fit correctly with the base.

## OPERATING THE BASE

Once filled, the HOM SHADE umbrella base provides exceptional stability for your patio umbrella. The heavy weight ensures your umbrella remains upright even in windy conditions.

## DURABLE MATERIAL

High-density HDPE Plastic

Wear

### Moving the Base

The base is equipped with built-in easy-grip handles and wheels for convenient movement. While the base is heavy when filled, you can tilt it onto its wheels to relocate it as needed. Avoid dragging the base without tilting, especially on rough surfaces, to prevent damage.

## CONVENIENT DESIGN

Built-in Easy-grip Handle for Easy Movement

## MAINTENANCE

Proper maintenance will extend the lifespan of your HOMSHADE umbrella base:

- **Cleaning:** Clean the base periodically with mild soap and water. Avoid harsh chemicals or abrasive cleaners that could damage the HDPE plastic or its protective coating.
- **Seasonal Storage:** For prolonged periods of non-use, especially during winter or extreme weather, it is recommended to empty the base plates of water or sand. This prevents potential damage from freezing water expansion and makes the plates lighter for storage.
- **Space-Saving Storage:** Once emptied, the four plates can be stacked neatly to save space.

# STACK AND STORE

Easy Stack for Space-saving Storage

Image: The stackable design of the base plates for easy storage.

- **Inspection:** Regularly inspect the base for any signs of wear, cracks, or damage. Ensure the fill caps are always securely fastened.

## TROUBLESHOOTING

Common issues and their solutions:

- **Base is difficult to move when full:** The base is designed to be heavy for stability. While it has wheels, it is intended to be tilted and rolled, not effortlessly pushed like a lightweight object. Ensure you are tilting the base sufficiently to engage the wheels for easier movement.
- **Umbrella feels unstable:**
  - Verify that all four plates are completely filled with water or sand.
  - Ensure the umbrella pole is properly seated and secured within the central opening of the base.
  - Confirm that the base is compatible with your specific umbrella model, especially regarding the screw hole distance (approx. 4.53 inches).
  - Check that the umbrella's weight does not exceed the base's capacity (423 lbs).

- **Leaking from fill spouts:** Ensure the twist caps are securely tightened after filling. Check for any debris or damage on the cap or spout threads that might prevent a proper seal.

## SPECIFICATIONS

<b>Brand</b>	HOMSHADE
<b>Model Number</b>	H19
<b>Item Weight</b>	28.7 pounds (empty)
<b>Max Fill Weight (Wet Sand)</b>	423 lbs
<b>Product Dimensions (L x W x H)</b>	23.62 x 23.62 x 18.11 inches
<b>Item Depth</b>	23.62 inches
<b>Color</b>	Black
<b>Material</b>	High-density HDPE Plastic
<b>Assembly Required</b>	No (filling required)

## IMPORTANT SAFETY INFORMATION

**Always ensure the base is properly weighted with water or sand to prevent tip-over. Do not use with umbrellas heavier than 423 lbs. Keep away from children and pets when filled with water.**

## WARRANTY AND SUPPORT

For any questions, concerns, or warranty claims regarding your HOMSHADE Patio Umbrella Base, please contact HOMSHADE customer support directly. Refer to your purchase documentation for specific warranty details.

Most products purchased on Amazon.com come with a 30-day return policy. Please check your order details for specific return eligibility.
