MUDDY Mitigator Cellular 24MP Imaging Trail Camera

MUDDY Mitigator Cellular 24MP Imaging Trail Camera User Manual

Model: Mitigator Cellular 24MP Imaging Trail Camera

1. Introduction

The MUDDY Mitigator Cellular 24MP Imaging Trail Camera is designed to provide high-quality surveillance for wildlife monitoring and security. This manual will guide you through the setup, operation, and maintenance of your new trail camera system.

Key Features:

- 24MP Imaging Resolution: Captures clear and detailed photos.
- 80 Feet Detection and Flash Range: Ensures broad area coverage.
- Cellular Connectivity: Stay connected via the Stealth Cam Command Pro app.
- Automatic Network Coverage: Selects the strongest Verizon or AT&T signal.
- On Demand Function: Capture real-time photos remotely.
- RUB Decoration: Blends seamlessly with natural environments.
- Bundle Includes: Camera, SD Card Reader and Viewer, 32GB SDHC UHS-I Memory Card, and USB 2.0 Card Reader.

3. SETUP GUIDE

3.1. Battery Installation

- 1. Open the camera housing latch.
- 2. Insert the required number of AA batteries (not included) into the battery compartment, ensuring correct polarity (+/-).
- 3. Close the battery compartment securely.

3.2. SD Card Insertion

- 1. Locate the SD card slot on the side of the camera.
- 2. Insert the provided 32GB SDHC UHS-I Memory Card into the slot until it clicks into place. Ensure the card is inserted in the correct orientation.
- 3. To remove, gently push the card in until it springs out.

3.3. Initial Power On and Network Setup

- 1. Turn the camera's power switch to the ON position.
- 2. The camera will automatically begin searching for the strongest cellular signal (Verizon or AT&T) using its Automatic Network Coverage feature.
- 3. Once a signal is acquired, the camera will display network status.
- 4. For optimal performance, ensure the camera is placed in an area with good cellular reception.

4. OPERATING INSTRUCTIONS

4.1. Stealth Cam Command Pro App

The MUDDY Mitigator camera is fully compatible with the new Stealth Cam Command Pro app. This app allows you to remotely monitor your cameras, download images and videos, and operate the camera from your mobile device.

- 1. Download the "Stealth Cam Command Pro" app from your mobile device's app store.
- 2. Create an account or log in.
- 3. Follow the in-app instructions to add your Mitigator camera using its unique ID.
- 4. Once connected, you can access camera settings, view captured media, and receive notifications.

4.2. On Demand Function

The On Demand function allows you to send a command to the camera to immediately capture photos of the hunting area in real-time. This feature is accessible through the Stealth Cam Command Pro app.

- 1. Open the Stealth Cam Command Pro app and select your Mitigator camera.
- 2. Navigate to the "On Demand" or "Capture Now" section.
- 3. Initiate the command to capture a photo. The camera will take a picture and send it to your app.

4.3. Image Sharing

The Stealth Cam Command Pro app allows you to share your Mitigator camera with other app users (lease buddies, family, friends) or easily share individual images via text messages, emails, or social media platforms.

5. MAINTENANCE

5.1. Cleaning

Regular cleaning ensures optimal performance and longevity of your camera.

- Wipe the camera's exterior with a soft, damp cloth. Avoid abrasive cleaners.
- Gently clean the lens and sensor window with a lens cleaning cloth to prevent scratches and ensure clear images.
- Ensure no debris obstructs the PIR sensor or flash.

5.2. Battery Replacement

Replace batteries when the low battery indicator appears on the camera or in the app. Always use fresh, high-quality batteries.

5.3. SD Card Management

Periodically format your SD card using the camera's menu or a computer to maintain performance and prevent data corruption. Back up important images before formatting.

6. TROUBLESHOOTING

6.1. Camera Not Powering On

- Check battery polarity and ensure batteries are fully charged.
- Verify the power switch is in the ON position.
- Try a different set of fresh batteries.

6.2. No Cellular Signal / Connectivity Issues

- Relocate the camera to an area with better cellular reception.
- Ensure the camera's antenna is securely attached and oriented correctly.
- Check your data plan status with your cellular provider.
- Verify the camera is properly registered and activated in the Stealth Cam Command Pro app.

6.3. Poor Image Quality / No Images Captured

- · Clean the camera lens and sensor window.
- Ensure the SD card is properly inserted and not full. Format the SD card if necessary (after backing up data).
- Check camera settings for resolution and trigger delay.
- Verify the PIR sensor is not obstructed and the detection range is appropriate for the placement.

7. SPECIFICATIONS

Feature	Detail
Product Dimensions	9.1 x 9.1 x 9.1 inches
Item Weight	10.43 pounds
ASIN	B0DNF21NY2
Date First Available	October 18, 2024
