GOLDEN HOUR GH-1323L

GOLDEN HOUR Men's Quartz Analog 38mm Watch Instruction Manual

Model: GH-1323L

Introduction

This instruction manual provides essential information for the proper setup, operation, and maintenance of your GOLDEN HOUR Men's Quartz Analog 38mm Watch (Model: GH-1323L). Please read this manual thoroughly to ensure optimal performance and longevity of your timepiece.

Product Overview

The GOLDEN HOUR GH-1323L is a quartz analog watch designed for clear readability and reliable timekeeping. Key features include:

- Adjustable 20mm genuine leather strap, fitting wrists up to 8 inches.
- Gray dial with full Arabic numerals for easy reading, including 24-hour military time markings.
- Silver-tone 38mm alloy case with a durable mineral glass crystal.
- Reliable imported Japan quartz movement with analog display and luminous hands for visibility in low light.
- Water resistance up to 30 meters (100 feet), suitable for splashes or brief immersion.

Figure 2: Rear view of the watch, displaying the stainless steel bezel, model number GH1323L, and water resistance rating.

Figure 3: Side profile of the watch, illustrating the adjustable strap length from minimum 6 inches to maximum 7.8 inches.

Setup

Setting the Time

1. **Locate the Crown:** The crown is the small knob on the right side of the watch case.
2. **Pull Out the Crown:** Gently pull the crown outwards to the first click position. You may feel a slight resistance.
3. **Adjust the Time:** Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the desired time. The watch features both 12-hour and 24-hour (military) time markings on the dial for precise setting.
4. **Push In the Crown:** Once the correct time is set, push the crown back into its original position against the watch case. This will start the watch movement.

Note: Ensure the crown is fully pushed in to maintain the watch's water resistance.

Operating Instructions

Daily Use

Your GOLDEN HOUR watch is designed for everyday wear. The quartz movement provides accurate timekeeping

with minimal intervention. The luminous hands will glow in low-light conditions after exposure to light, enhancing readability.

Figure 4: The GOLDEN HOUR watch worn on a wrist, demonstrating its fit and appearance during daily use.

Water Resistance

This watch is water resistant to 30 meters (100 feet). This rating means the watch is suitable for:

- Accidental splashes
- Rain
- Brief immersion in water (e.g., washing hands)

Important: It is *not* suitable for swimming, diving, snorkeling, or showering. Do not operate the crown while the watch is wet or submerged, as this can compromise the water seal.

Maintenance

Cleaning Your Watch

- **Case and Crystal:** Wipe the watch case and mineral glass crystal with a soft, dry, lint-free cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.

- **Leather Strap:** Avoid prolonged exposure of the leather strap to water, direct sunlight, and harsh chemicals. Clean the strap with a soft, damp cloth and allow it to air dry completely. Leather conditioners specifically designed for watch straps can help maintain its flexibility and appearance.

Battery Replacement

The watch is powered by a quartz battery. When the watch stops running, it indicates that the battery needs replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure the watch's water resistance is maintained after the case back is opened and resealed.

Troubleshooting

Problem	Possible Cause	Solution
Watch is not running.	Battery depleted.	Replace the battery (refer to Maintenance section).
Time is inaccurate.	Crown not fully pushed in; watch exposed to strong magnetic fields.	Ensure crown is fully pushed in. Keep watch away from strong magnets. If problem persists, battery may be low or watch may require servicing.
Moisture inside the watch.	Crown was not fully pushed in; watch exposed to water beyond its resistance rating.	Immediately take the watch to a qualified technician for inspection and drying to prevent damage. Ensure crown is always fully pushed in.

Specifications

Brand	GOLDEN HOUR
