## Setup and Assembly

Follow the step-by-step instructions provided in the included manual to assemble your micro block parrot. Due to the small size of the blocks, it is recommended to work on a clean, well-lit surface to prevent loss of pieces. Organize blocks by color or shape as suggested in the manual to streamline the building process. Ensure each block is firmly connected to the next for a stable and complete model.

## Operating and Display

Once assembled, your micro block parrot is ready for display. These models are designed as decorative ornaments and can be placed on shelves, desks, or any flat surface. Some models feature movable parts, such as wings, allowing for slight adjustments to their pose. Handle the assembled models with care to avoid dislodging any micro blocks.

## Maintenance

To maintain the appearance of your micro block models, gently dust them with a soft, dry cloth or a small brush. Avoid using water or harsh cleaning agents, as these can damage the blocks or cause discoloration. Store models away from direct sunlight and

extreme temperatures to prevent material degradation.

## Troubleshooting

- **Missing Pieces:** Carefully check all packaging materials. If pieces are genuinely missing, contact Bibilock customer support with your product model number and details of the missing parts.
- **Difficulty Connecting Blocks:** Ensure blocks are aligned correctly before applying gentle, firm pressure. Micro blocks require precise alignment. If a block is particularly stubborn, try wiggling it slightly while pressing.
- **Model Instability:** Re-examine the assembly steps, particularly for the base and core structure. Ensure all connections are secure. Applying a small amount of model glue (not included) to critical, non-visible connections can enhance stability for display purposes, but this is optional and permanent.
- **Instructions Hard to Follow:** Refer to the product images and video demonstrations available online for visual guidance. Some steps may require careful observation due to the small scale of the blocks.
