# Sheawasy SH-D50 Underwater Camera User Manual

Model: SH-D50

Your guide to capturing stunning underwater memories.

## 1. INTRODUCTION

The Sheawasy SH-D50 is a versatile and durable underwater camera designed for capturing high-resolution photos and videos in various environments, including underwater up to 33 feet. Featuring a dual-screen design, 4K video recording, 48MP photo capability, and anti-shake technology, it is an ideal companion for your adventures.

## 3. SETUP

### 3.1 Battery Installation and Charging

The camera comes with a pre-installed Lithium Polymer battery. Before first use, ensure the camera is fully charged.

1. Locate the battery compartment on the camera.
2. Insert the battery, ensuring correct polarity.
3. Connect the camera to a USB power source using the provided USB cable. The charging indicator will illuminate.
4. Charging is complete when the indicator light changes or turns off (refer to camera display for status). A full charge provides approximately 100 minutes of battery life.

### 3.2 Memory Card

A 64GB memory card is included and pre-installed, providing ample storage for approximately 8000 photos or 3 hours of video. No additional setup is required for the memory card.

## 4. OPERATING INSTRUCTIONS

### 4.1 Power On/Off

Press and hold the Power button (usually marked with a power symbol) to turn the camera on or off.

### 4.2 Photo and Video Capture

The camera supports 48MP still photos and 4K video recording. Use the mode button to switch between photo and video modes. Press the Shutter button to capture a photo or start/stop video recording.

## 4.6 Transferring Files to Computer

To transfer photos and videos from your camera to a computer:

1. Connect the digital camera to your laptop or computer via the provided USB cable.
2. On the camera's screen, select the
