MAINTENANCE

General Care

Keep the figure clean by gently wiping with a dry, soft cloth. Avoid harsh chemicals or abrasive materials. Store in a cool, dry place away from direct sunlight to prevent discoloration or material degradation.

Battery Replacement

The light-up features require 2 Nonstandard Battery batteries (included). To replace batteries, remove the upper chest parts, then the back chest parts, and finally the front waist parts as shown in the detailed instruction manual. Use a Phillips screwdriver (not included) to open the battery compartment and replace the batteries of the light module.

TROUBLESHOOTING

Fragile Parts

Some small parts, particularly the fingers, may be delicate. Handle with care during assembly and posing. If a part breaks, super glue can often provide a discreet repair. For significant damage or missing parts, please contact customer support.

Faceplate Panel Sticking

The top panel used to swap faceplates may occasionally stick up slightly. Gently press it down to ensure it is flush with the head sculpt.
