PGYTECH PG-035

PGYTECH MagCam Phone Grip Kit User Manual

Model: PG-035

1. INTRODUCTION

The PGYTECH MagCam Phone Grip Kit is a versatile 3-in-1 mobile phone accessory designed for photography enthusiasts. It integrates MagSafe wireless charging, a detachable Bluetooth remote, and a built-in power bank, offering enhanced control and convenience for smartphone photography and daily use. This manual provides detailed instructions for setup, operation, and maintenance of your MagCam Phone Grip Kit.

2. WHAT'S IN THE Box

Upon unboxing your PGYTECH MagCam Phone Grip Kit, please ensure all the following components are present:

- EDC Magnetic Mount
- Camera Grip (Remote Control Included)
- Magnetic ring
- Hand Strap
- Instruction manual

3. SETUP

3.1 Assembling the MagCam Phone Grip

The MagCam Phone Grip features a modular design. To assemble, securely attach the Bluetooth Remote Module to the top of the Charging Grip Module. Then, slide the Magnetic Wireless Charging Module onto the side of the Charging Grip Module until it clicks into place. Ensure all connections are firm for stable operation.

3.2 Bluetooth Pairing (for iPhone Users)

Before using the remote control functions, you need to pair the MagCam Phone Grip with your iPhone via Bluetooth. Follow these steps:

1. Open your iPhone's **Settings** application.
2. Navigate to **Accessibility**.
3. Select **Touch**.
4. Enable **AssistiveTouch** by toggling the switch to the ON position.
5. Scroll down and set the **Tracking Sensitivity** to the lowest possible setting.
6. Open your iPhone's Control Center (swipe down from the top-right corner on newer iPhones, or up from the bottom on older models) and ensure **Portrait Orientation Lock** is enabled.
7. Go back to **Settings** and select **Bluetooth**.
8. Press and hold the On/Off button on the MagCam's remote control for 1 second to turn it on. The blue light on the

remote will indicate it's ready for pairing.

9. In your iPhone's Bluetooth settings, locate "PGY-MagCam" in the list of devices and tap to pair. Confirm the pairing request if prompted.

Quickstart for iPhone

1. Open the 'Settings' of your phone, select 'Accessibility'

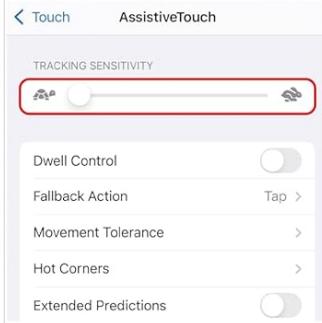

2. Select 'Touch'

3. Select 'Assistive Touch'

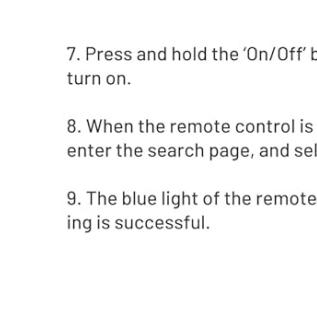

4. Open 'Assistive Touch' and slide down the current page

5. Adjust the 'Tracking Sensitivity' to '0'

6. Turn on the vertical orientation lock of the phone

7. Press and hold the 'On/Off' button of the remote control for 1 second to turn on.

8. When the remote control is turned on, turn on your phone's Bluetooth to enter the search page, and select 'PGY-MagCam' for pairing.

9. The blue light of the remote control is always on, which means the pairing is successful.

Function Description

Single-Click: Turn on the MagCam battery module to charge the phone and remote control.
Double-Click: Turn off the MagCam battery module.

Note: Press and hold the 'Lens Flip Button' and 'Power On Button' at the same time to delete the Bluetooth memory and re-pair.

4. OPERATING INSTRUCTIONS

4.1 Wireless Charging Function

The MagCam Phone Grip features a built-in 3000mAh battery that supports MagSafe magnetic wireless charging. To initiate charging, simply attach your iPhone (12-16 series compatible) to the magnetic charging module and press the power button on the grip. The grip module can also function as a compact 10W power bank. Double-press the power button to stop charging.

Install & Lock: Steady as You Go

4.2 Detachable Bluetooth Remote Control

The Bluetooth remote detaches from the grip, allowing for remote control of your camera up to 10 meters away. This is ideal for group photos or stable shots.

- **Zoom/Focus Adjustment:** Toggle the dial on the remote control left or right to adjust the focal length (zoom in/out) within your camera app.
- **Capture Photo/Start Recording:** Half-press the front button on the remote to focus. Fully press the front button to capture a photo or start/stop video recording.
- **Camera Flip:** Double-tap the front button on the remote to switch between the front and rear cameras.

4.3 Integrated Phone Stand

The wireless charging module can transform into a magnetic phone stand with one click. Simply detach the charging

module from the grip and unfold the integrated metal support leg. This allows for convenient hands-free viewing of photos and videos.

One Tool, Multiple Uses

Used as a Compact Power Bank

Used as an EDC Stand

Image: Illustrates the MagCam Phone Grip's dual functionality as a compact power bank and an everyday carry (EDC) stand.

4.4 Additional Features

- **Tripod Compatibility:** The bottom of the grip features a 1/4" thread, allowing it to be mounted on tripods and other photography accessories for stable shots.
- **Magnetic Ring Included:** A magnetic ring is included for compatibility with non-MagSafe phones (e.g., Android devices), enabling them to utilize the magnetic charging and grip features. For iPhones, it is best used with a MagSafe-enabled case.
- **Dual-sided Magnet:** The magnetic charging module has a dual-sided magnet, allowing for attachment of additional accessories like fill lights (sold separately).

5. MAINTENANCE

- Cleaning:** Use a soft, dry cloth to clean the surface of the MagCam Phone Grip. Avoid using harsh chemicals or abrasive materials.
- Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- Battery Care:** To prolong battery life, avoid fully discharging the power bank frequently. Charge it regularly, even if not in active use.

6. TROUBLESHOOTING

Issue	Possible Cause	Solution
-------	----------------	----------

Issue	Possible Cause	Solution
Device does not power on.	Low battery; internal malfunction.	Ensure the grip is fully charged. If issue persists, contact customer support.
Bluetooth remote does not connect or disconnects frequently.	Incorrect pairing; interference; low battery in remote.	Ensure AssistiveTouch is enabled and Tracking Sensitivity is set to lowest on iPhone. Re-pair the Bluetooth remote (forget device and pair again). Ensure the remote has sufficient power (it charges when attached to the grip). Reduce distance between phone and remote.
Wireless charging not working.	Misalignment; phone not MagSafe compatible; grip battery low.	Ensure phone is correctly aligned on the magnetic module. Verify phone compatibility (iPhone 12-16 series or MagSafe-enabled case). Charge the MagCam Phone Grip.
Remote control functions (zoom, focus, flip) not working.	Bluetooth not connected; app compatibility; incorrect settings.	Confirm Bluetooth connection. Ensure you are using the native camera app or a compatible third-party app. Verify AssistiveTouch settings as per setup instructions.
