onerbl USB-C Charging Cable

onerbl USB-C Charging Cable User Manual

For TREKURE Beta01 & Beta06 Portable Car Jump Starters

Introduction

This manual provides comprehensive instructions for the onerbl USB-C Charging Cable, designed as a replacement or spare power supply cord for your TREKURE Beta01 or Beta06 Portable Car Jump Starter with Air Compressor. This cable facilitates charging of the jump starter's internal lithium polymer battery, ensuring your device remains ready for use. Please read this manual carefully to ensure proper usage and longevity of your cable.

Image: The onerbl USB-A to USB-C charging cable. One end features a standard USB-A connector, and the other end features a reversible USB-C connector. The cable is black and coiled for display.

Setup

1. **Identify Connectors:** Locate the USB-A connector (the rectangular end) and the USB-C connector (the smaller, oval-shaped, reversible end) on your onerbl charging cable.
2. **Connect to Power Source:** Insert the USB-A connector into a compatible 5V USB power adapter (e.g., a wall charger, car charger, or computer USB port). Ensure the power source provides a stable 5V DC output.
3. **Connect to Jump Starter:** Insert the USB-C connector into the designated charging port on your TREKURE Beta01 or Beta06 Portable Car Jump Starter. The USB-C connector is reversible, so it can be inserted in either orientation.
4. **Verify Connection:** Confirm that both ends of the cable are securely connected. The jump starter should indicate that it is receiving power, typically through an LED indicator.

Operating

Once the cable is properly connected as described in the Setup section, the TREKURE Beta01 or Beta06 Portable Car Jump Starter will begin charging. The cable is designed for efficient power transfer at 5V DC.

- **Charging Indication:** Refer to your TREKURE jump starter's specific user manual for details on its charging indicators (e.g., blinking LEDs, battery level display).
- **Charging Time:** Charging duration will vary depending on the jump starter's battery level and the output capacity of your 5V USB power adapter.
- **Disconnection:** Once charging is complete, or if you need to disconnect, gently pull the connectors straight out from the power source and the jump starter. Avoid pulling on the cable itself to prevent damage.

Maintenance

Proper care of your onerbl USB-C charging cable will ensure its longevity and reliable performance.

- **Storage:** Store the cable in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tightly coiling or bending the cable sharply, which can damage internal wires.
- **Cleaning:** If necessary, gently wipe the cable and connectors with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- **Inspection:** Periodically inspect the cable for any signs of wear, fraying, or damage to the connectors. Discontinue use if any damage is observed.
- **Handling:** Always grasp the connector housing when plugging in or unplugging the cable. Never pull on the cable itself.

Troubleshooting

If you encounter issues while using your onerbl USB-C charging cable, consider the following:

- **Cable Not Charging:**
  - Ensure both the USB-A and USB-C connectors are fully and securely inserted.
  - Verify that the 5V USB power adapter is functioning correctly and providing power. Try a different power adapter or USB port.
  - Check the charging port on your TREKURE jump starter for any obstructions or damage.
  - Inspect the cable for visible damage (frays, bends, broken connectors). If damaged, replace the cable.
- **Slow Charging:**
  - Ensure your 5V USB power adapter provides sufficient current output (e.g., 2A or higher for faster charging, if supported by the jump starter).
  - Avoid using excessively long USB extension cables, which can lead to voltage drop.

Specifications

Brand	onerbl
Connector Type	USB-A to USB-C
Cable Type	USB
Compatible Devices	TREKURE Beta01, TREKURE Beta06 Portable Car Jump Starter with Air Compressor Lithium Polymer Battery DC5V 5VDC 5.0V
Special Feature	Fast Charging (when paired with compatible power source and device)

Color	Black
Input/Output Voltage	DC 5V

Warranty Information

This onerbl product is typically covered by a standard manufacturer's warranty against defects in materials and workmanship. Please retain your proof of purchase for warranty claims. For specific warranty terms and conditions, refer to the documentation provided at the time of purchase or contact the retailer.

Support

For further assistance, technical support, or inquiries regarding your onerbl USB-C Charging Cable, please contact the retailer or the manufacturer directly. Ensure you have your product model and purchase details available when seeking support.
