3. PRODUCT OVERVIEW

Familiarize yourself with the main components of your BOBLOV KJ23PRO body camera.

Image: Front view of the BOBLOV KJ23PRO body camera, showing the display screen and control buttons below it.

- **Camera Lens:** Captures video and still images.
- **Infrared Lights:** Five IR lights for enhanced night vision.
- **LCD Display:** Shows live view, recorded footage, and menu options.
- **Control Buttons:** Power, Menu, Record, Photo, Navigation buttons.
- **USB-C Port:** For charging and data transfer.
- **Microphone:** Records audio.
- **Speaker:** For audio playback.

4. SETUP

4.1 Charging the Battery

Before first use, fully charge the camera's internal 4000mAh battery. Use the provided USB-C cable and a compatible power adapter (not included) or the car charger.

1. Connect the USB-C cable to the camera's USB-C port.
2. Connect the other end of the cable to a USB power source (e.g., wall adapter, computer, car charger).
3. The charging indicator light will illuminate. It will turn off or change color when fully charged.

4.2 Attaching the Clips

Select the appropriate clip (long 360° or short 360°) for your intended use and attach it to the camera's mounting slot. The clips allow for flexible positioning on clothing or gear.

4.3 Initial Power On and Settings

Press and hold the Power button to turn on the camera. Upon first use, you may need to set the date and time. Navigate through the menu using the control buttons to adjust settings such as resolution, loop recording duration, and other preferences.

Image: The BOBLOV KJ23PRO camera's screen showing the 128GB internal storage capacity, indicating it's ready for use.

5. OPERATING INSTRUCTIONS

5.1 Video Recording

To start recording video, press the Record button. The camera will capture footage in 2K resolution (2560x1440 pixels) at 30 frames per second. Press the Record button again to stop recording.

Image: An urban street scene illustrating the clarity and detail captured by the camera's 1440P (2K) resolution.

5.2 Loop Recording

The KJ23PRO supports loop recording, which automatically overwrites the oldest files when the storage is full. By default, video segments are 10 minutes long. You can adjust the segment duration in the camera settings, with a maximum of 30 minutes per segment.

Image: A visual representation of loop recording options, showing video fragment durations from 5 minutes up to a maximum of 30 minutes.

5.3 Taking Photos

To capture a still image, press the Photo button. The camera will take a 38-megapixel photo.

5.4 Night Vision Mode

The camera is equipped with five infrared lights for clear recording in low-light conditions or complete darkness. Night vision can be activated manually or set to automatic in the camera's menu.

Image: A visual comparison of the camera's performance during daytime and nighttime conditions.

5.5 Connecting to a Computer

To transfer recorded files, connect the camera to your computer using the provided USB-C cable. Ensure the camera is powered on before connecting. It will appear as a removable disk drive, allowing you to access and copy your video and photo files.

5.6 Using as a Driving Recorder

The KJ23PRO can also function as a driving recorder. Use the included car mount and car charger to secure and power the camera in your vehicle. Its loop recording feature is ideal for continuous dashcam use.

6. MAINTENANCE

6.1 Cleaning

Wipe the camera body with a soft, dry cloth. For the lens, use a specialized lens cleaning cloth and solution to avoid scratches. Do not use harsh chemicals or abrasive materials.

6.2 Storage

Store the camera in a cool, dry place away from direct sunlight and extreme temperatures. Ensure the battery is partially charged (around 50%) if storing for extended periods to prolong battery life.

6.3 Water Resistance (IP66)

The KJ23PRO has an IP66 rating, meaning it is protected against dust ingress and powerful water jets. This makes it suitable for outdoor use in various weather conditions, such as rain or splashes. **It is not designed for submersion in water.**

Image: A hand holding the BOBLOV KJ23PRO camera while water splashes on it, demonstrating its IP66 water resistance.

7. TROUBLESHOOTING

If you encounter issues with your BOBLOV KJ23PRO, refer to the following common problems and solutions:

- **Camera does not power on:**
 - Ensure the battery is charged. Connect to a power source and try again.
 - Press and hold the Power button for several seconds.
- **Cannot record video/take photos:**
 - Check if the internal storage is full. Transfer files to a computer to free up space.
 - Ensure the camera is not in playback mode or connected to a computer.
- **Poor video/photo quality:**
 - Clean the camera lens.
 - Ensure adequate lighting. For low light, activate night vision.

- Check resolution settings in the menu.
- **Computer does not recognize the camera:**
 - Ensure the camera is powered on before connecting to the computer.
 - Try a different USB-C port or cable.
 - Restart your computer and the camera.
