Casio GM700-1A

Casio G-Shock G-Steel GM700-1A User Manual

Model: GM700-1A | Brand: Casio

Introduction

This manual provides detailed instructions for the proper use and maintenance of your Casio G-Shock G-Steel GM700-1A watch. Designed for durability and performance, this timepiece combines analog and digital displays with a robust stainless-steel and resin construction. Please read this manual thoroughly to ensure optimal performance and longevity of your watch.

Product Overview

Figure 1: Front View. This image displays the front of the Casio G-Shock G-Steel GM700-1A watch, highlighting its silver metallic bezel, black resin band, and the combination analog and

digital display. The digital display shows the day and time, while the analog hands indicate the current time. Various function buttons are visible around the bezel.

Figure 2: Back View. This image shows the rear of the Casio G-Shock G-Steel GM700-1A watch. The stainless steel case back is clearly visible, featuring engravings such as "SHOCK RESIST," "WATER RESIST 20BAR," and the model number "GM700." The black resin band is also shown attached to the watch case.

Setup

1. Initial Power-On and Time Zone Setting

Upon first use or after a battery change, the watch may require initial setup. Press and hold the**ADJUST** button (top left) until the city code starts flashing. Use the **FORWARD** (top right) and **REVERSE** (bottom right) buttons to select your home city code. This will automatically set the time zone.

2. Setting Time and Date

1. In Timekeeping Mode, hold down the **ADJUST** button until the seconds start flashing.
2. Press the **MODE** button (bottom left) to cycle through the settings: Seconds → DST → Hour → Minute → Year → Month → Day → 12/24-hour format.
3. Use the **FORWARD** and **REVERSE** buttons to change the flashing value.
4. Once all settings are correct, press the **ADJUST** button to exit the setting mode.

Operating Instructions

1. Mode Navigation

Press the **MODE** button (bottom left) to cycle through the different modes: Timekeeping Mode → Stopwatch Mode → Countdown Timer Mode → Alarm Mode → World Time Mode.

2. Stopwatch Function

- Enter Stopwatch Mode by pressing the **MODE** button.
- Press the **START** button (bottom right) to start and stop the stopwatch.
- Press the **RESET** button (top right) to reset the stopwatch to zero.

3. Alarm Setting

- Navigate to Alarm Mode using the **MODE** button.
- Hold the **ADJUST** button until the alarm time starts flashing.
- Use the **MODE** button to select hour or minute, and **FORWARD**/**REVERSE** buttons to change the value.
- Press **ADJUST** to save the alarm setting.
- Press the **START** button to toggle the alarm on/off.

4. Backlight (Illuminator)

Press the **ILLUMINATOR** button (front bottom center) to illuminate the digital display for easy viewing in low light conditions.

Maintenance

1. Cleaning Your Watch

Wipe the watch with a soft, dry cloth to remove dirt and moisture. For stubborn dirt, use a soft cloth dampened with water and a mild neutral detergent, then wipe dry. Avoid using volatile agents like thinner or benzine, as they may damage the resin components.

2. Water Resistance

The GM700-1A is water resistant to 20 BAR (200 meters). This means it is suitable for everyday use, showering, swimming, and diving. Do not operate buttons while the watch is wet or submerged in water to prevent water ingress.

3. Battery Replacement

The watch uses one LR44 battery. When the display becomes dim or functions become erratic, it may be time to replace the battery. Battery replacement should ideally be performed by a qualified technician to ensure proper sealing and water resistance is maintained.

Troubleshooting

Problem	Possible Cause	Solution
Digital display is blank or dim.	Low battery.	Replace the battery.
Analog hands do not match digital time.	Hands are misaligned.	In Timekeeping Mode, hold **FORWARD** button for 3 seconds to enter hand alignment mode. Use **FORWARD**/**REVERSE** to adjust hands, then **ADJUST** to save.
Watch buttons are unresponsive.	Watch is in a frozen state or low battery.	Try resetting the watch by holding all four buttons simultaneously for a few seconds. If problem persists, replace battery.
Water condensation inside the watch.	Seal integrity compromised or extreme temperature change.	Seek professional service immediately to prevent damage.

Specifications

- **Model Number:** GM700-1A
- **Case Dimensions:** Approximately 58mm x 53mm
- **Weight:** Approximately 9.95 ounces
- **Water Resistance:** 20 BAR (200 meters)
- **Battery Type:** 1 x LR44
- **Clasp Type:** Buckle
- **Display:** Analog and Digital
- **Features:** Stopwatch, Countdown Timer, Alarm, World Time, LED Backlight (Illuminator)
