4. SETUP INSTRUCTIONS

4.1 Initial Opening and Battery Installation

1. Locate the emergency keyhole, usually hidden behind the keypad cover or a small plate.
2. Insert one of the emergency keys and turn it to unlock the safe.
3. Open the safe door.
4. Inside the door, locate the battery compartment. Insert 4 AA batteries (not included) according to the polarity markings.
5. Close the battery compartment.

4.2 Setting Your Passcode

The safe supports both a User Code and a Master Code. Both can be 1 to 6 digits long.

Set Your Passcode

1. Set User Code

- ① With the door unlocked, press the reset button, LCD screen will show "....." with a beep sound;
- ② Enter the new user passcode (1 to 6 digits) and press "LOCK" to confirm. It will be confirmed when the LCD screen showing "IN"

2. Set Master Code

- ① With the door unlocked, press "0" twice and press the reset button, LCD screen will show "-----" with a beep sound;
- ② Enter the new master passcode (1 to 6 digits) and press "LOCK" to confirm. It will be confirmed when the LCD screen showing "IN"

Dual Alarm System

1. **Wrong Code Alarm:** Input wrong code 3 times, it will beep for 20 seconds and the keypad will be locked for 3 minutes.

(You can use key to open the door to stop the alarm)

2. **Vibration Alarm:** When screen is off, press "CLEAR" button, if someone pry or thrill the safe, the LCD screen will show "ALERT" and beep for 20 seconds.

(You can use key to open the door or input the right code to stop the alarm)

Image: Detailed steps for setting the user and master passcodes using the digital keypad.

To Set User Code:

1. With the door unlocked, press the reset button (usually a small red button inside the door). The LCD screen will display "-----" with a beep sound.
2. Enter your new user passcode (1 to 6 digits) and press "LOCK" to confirm. The LCD screen will show "IN" upon successful confirmation.

To Set Master Code:

1. With the door unlocked, press "0" twice and then press the reset button. The LCD screen will display "-----" with a beep sound.
2. Enter your new master passcode (1 to 6 digits) and press "LOCK" to confirm. The LCD screen will show "IN" upon successful confirmation.

Note: The master code can always open the safe, even if the user code is changed or forgotten. Keep it secure.

4.3 Mounting the Safe Box

For enhanced security, it is recommended to anchor the safe box to a floor or wall.

1. Choose a suitable location, ensuring a solid surface for mounting.
2. Open the safe door and locate the pre-drilled mounting holes on the back or bottom of the safe.

3. Mark the drilling points on the wall or floor through the holes.
4. Drill pilot holes using an appropriate drill bit for your chosen surface.
5. Align the safe with the drilled holes and secure it using the provided expansion bolts.
6. Ensure the safe is firmly attached and stable.

5.4 Removable Shelf

The safe includes a removable shelf to customize the interior storage space. To adjust or remove the shelf, simply lift it and slide it out from its supports. Reinsert by aligning it with the desired supports.

VIBRATION ALARM

STAY ALERT WITH IMMEDIATE NOTIFICATIONS IF YOUR SAFE IS TAMPERED WITH.

Image: The safe's interior demonstrating the removable shelf feature, allowing for flexible organization of valuables.

6. SECURITY FEATURES

6.1 Dual Alarm System

Wrong Code Alarm:

If an incorrect code is entered 3 consecutive times, the safe will emit an audible alarm for 20 seconds, and the keypad will be locked for 3 minutes. To stop the alarm, use the emergency key to open the door or wait for the lockout period to expire.

Vibration Alarm:

If the safe detects significant vibration or tampering, an alarm will sound for 20 seconds, and the LCD screen will display "ALERT". To stop the alarm, press "CLEAR" on the keypad, use the emergency key to open the door, or enter the correct code.

6.2 Hidden Password Feature (Privacy Protection)

The keypad features a hidden password input system. When entering your code, the numbers may not be immediately visible on the LCD, enhancing privacy and preventing others from seeing your entry.

Image: A detailed view of the safe's keypad and LCD screen, demonstrating the privacy protection feature where the password input is hidden.

7. MAINTENANCE

- **Cleaning:** Wipe the safe's exterior with a soft, damp cloth. Avoid abrasive cleaners.
- **Battery Replacement:** When the low battery indicator (red flashing light on LCD) appears, replace all 4 AA batteries promptly. Use the emergency key to open the safe if batteries are completely drained.
- **Key Storage:** Store emergency keys in a secure location away from the safe.
