

## LOFREE Flow Lite 100 Keys

# LOFREE Flow Lite 100 Keys Low Profile Mechanical Keyboard User Manual

Model: OE922

## 1. INTRODUCTION

This manual provides detailed instructions for the LOFREE Flow Lite 100 Keys Low Profile Mechanical Keyboard. It covers setup, operation, maintenance, and troubleshooting to ensure optimal performance and user experience. The Flow Lite keyboard features a compact 100-key layout, low-profile Specter linear switches, multi-mode connectivity (2.4GHz wireless, Bluetooth, USB-C wired), and PBT double-shot keycaps.

Image 1.1: LOFREE Flow Lite 100 Keys Low Profile Mechanical Keyboard (Off-White).

## 2. SETUP

### 2.1. Package Contents

- LOFREE Flow Lite 100 Keys Mechanical Keyboard
- USB-C Cable
- 2.4G Wireless Receiver (located in the keyboard's storage slot)
- User Manual (this document)

### 2.2. Initial Charging

Before first use, it is recommended to fully charge the keyboard. Connect the supplied USB-C cable to the keyboard's USB-C port and the other end to a power source (e.g., computer USB port, USB wall adapter). The keyboard features a built-in 3000mAh lithium battery, providing up to 100 hours of working time with all lights off. A full charge typically takes approximately 3 hours.

## 2.3. Connectivity Modes

The Flow Lite keyboard supports three connection modes: 2.4GHz Wireless, Bluetooth, and Wired (USB-C).

Image 2.1: The keyboard offers flexible 3-mode connectivity: Bluetooth, 2.4GHz wireless, and wired USB-C.

### 2.3.1. 2.4GHz Wireless Connection

1. Locate the 2.4G wireless receiver in the storage slot on the keyboard.
2. Plug the 2.4G receiver into an available USB port on your computer.
3. Toggle the connection switch on the keyboard to the 2.4G wireless mode. The keyboard will automatically connect.

### 2.3.2. Bluetooth Connection

1. Toggle the connection switch on the keyboard to Bluetooth mode.
2. On your device (computer, tablet, smartphone), enable Bluetooth and search for new devices.
3. Select "LOFREE Flow Lite" from the list of available devices to pair.
4. The keyboard can store up to three Bluetooth connections. Use Fn + 1, Fn + 2, or Fn + 3 to switch between paired devices.

### 2.3.3. Wired USB-C Connection

1. Connect the supplied USB-C cable to the keyboard's USB-C port.
2. Connect the other end of the USB-C cable to an available USB port on your computer.
3. Toggle the connection switch on the keyboard to wired mode. The keyboard will function as a wired device and charge simultaneously.

### 2.4. Adjustable Kickstand

The keyboard features a built-in adjustable kickstand, allowing you to set the typing angle to either 3 or 6 degrees for ergonomic comfort.

Image 2.2: The keyboard's adjustable kickstand offers two typing angles (3 and 6 degrees).

## 3. OPERATING INSTRUCTIONS

---

### 3.1. Key Functions

The Flow Lite keyboard includes standard alphanumeric keys, a numeric keypad, and function keys with secondary media and control functions accessible via the Fn key.

- **Fn + F1-F12:** Access media controls, backlight settings, and other system functions. Refer to the keycap legends for specific functions.
- **Volume Roller:** An aluminum roller located on the top right allows for intuitive volume adjustment. Roll up to increase volume, roll down to decrease. Press to mute/unmute.

# Roll Up the Volume

Image 3.1: The integrated volume roller provides convenient audio control.

## 3.2. Backlighting

The keyboard features single-color backlighting. Use the Fn key in combination with designated function keys (e.g., Fn + F5/F6) to adjust brightness or change backlight patterns. The PBT double-shot keycaps are designed for shine-through, ensuring clear visibility of characters.

## PBT+PC Double Shot Design for Shine-Through

Image 3.2: PBT double-shot keycaps with PC elements for effective backlighting shine-through.

### 3.3. Lofree Key Mapper Software

Customize key assignments and lighting effects using the Lofree Key Mapper software. This software is designed exclusively for the Flow Lite series and is compatible with Windows operating systems only.

# Lofree Key Mapper

 **For Windows Only**

Image 3.3: The Lofree Key Mapper software allows for personalized keyboard configuration (Windows only).

## 3.4. 1000Hz Polling Rate

The keyboard supports a 1000Hz polling rate in 2.4GHz wireless mode, providing fast and responsive performance comparable to wired connections, suitable for demanding tasks and gaming.

# 1000Hz

Image 3.4: The keyboard delivers a 1000Hz polling rate for responsive input.

## 4. MAINTENANCE

---

### 4.1. Cleaning

To clean the keyboard, power it off and disconnect any cables. Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution. Avoid harsh chemicals or abrasive materials. For cleaning between keycaps, use compressed air or a small brush.

### 4.2. Battery Care

To prolong battery life, avoid fully discharging the keyboard frequently. Store the keyboard in a cool, dry place when not in use for extended periods. Charge the battery regularly, even if not used daily.

## 5. TROUBLESHOOTING

---

- **Keyboard not responding:** Ensure the keyboard is charged. Check the connection mode switch (2.4G, Bluetooth, or Wired) and ensure it matches your intended connection. For 2.4G, verify the receiver is properly inserted. For

Bluetooth, ensure it's paired correctly and your device's Bluetooth is active. For wired, check the USB-C cable connection.

- **Intermittent connection:** Move the keyboard closer to the receiver/device for wireless connections. Avoid sources of interference (e.g., other wireless devices, large metal objects).
- **Backlight not working:** Ensure the backlight is enabled and brightness is adjusted using the Fn key combinations. Check battery level; low battery may disable backlighting.
- **Keys not registering:** If specific keys are not working, ensure they are properly seated. The keyboard features hot-swappable switches, allowing for easy replacement if a switch is faulty.
- **Lofree Key Mapper not detecting keyboard:** Ensure the keyboard is connected via USB-C and the software is up to date. Remember the software is Windows-only.

## 6. SPECIFICATIONS

Product Dimensions	14.74 x 5.43 x 0.93 inches
Item Weight	2.14 pounds
Manufacturer	LOFREE
Item Model Number	OE922
Batteries	1 Lithium Polymer batteries required (included)
Compatible Devices	Laptop, PC
Connectivity Technology	Bluetooth, USB-C, 2.4G Wi-Fi
Keyboard Description	Mechanical
Special Features	Backlit, Hot-Swappable, Hotkeys and Media Keys, Low-Profile Key, Volume Roller
Keyboard Backlighting Color Support	Single Color
Material	Acrylonitrile Butadiene Styrene (ABS)

### 6.1. Specter Linear Switches

The Flow Lite keyboard is equipped with Specter Full POM Linear Switches, co-developed with Kailh. These low-profile switches feature a light actuation force of 40gf, designed to reduce finger fatigue during extended typing sessions.

Hot Swappable

Image 6.1: Specter Full POM Linear Switches, featuring a 40gf actuation force for a light and delicate touch.

## 6.2. Gasket Design

The keyboard incorporates a gasket-mounted design with multiple sound-dampening layers, including silicon gaskets, sandwich silicone pad, IXPE pad, and sound-absorbing PU foam. This construction provides a soft, cushioned typing feel and a richer acoustic profile for each keystroke.

Image 6.2: Exploded view illustrating the multi-layered gasket design for enhanced typing feel and sound.

## 7. WARRANTY AND SUPPORT

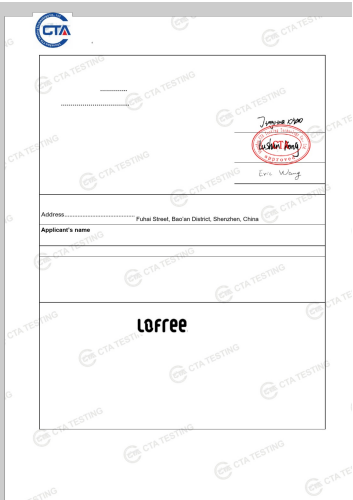

LOFREE products are covered by a manufacturer's warranty against defects in materials and workmanship. For specific warranty terms, duration, and to register your product, please refer to the official LOFREE website or contact their customer support directly. Keep your proof of purchase for warranty claims.

For technical assistance, troubleshooting not covered in this manual, or general inquiries, please visit the LOFREE support page or contact their customer service team.

According to §1.1307(b)(1), systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess of the Commission's guidelines.

[illegible]

- Power and distance are rounded to the nearest mW and mm before calculation
- The result is rounded to one decimal place for comparison
- 3.0 and 7.5 are referred to as the numeric thresholds in the step 2 below

The test exclusions are applicable only when the minimum test separation distance is  $\geq 50$  mm and for transmission frequencies between 100 MHz and 6 GHz. When the minimum test separation distance is  $< 5$  mm, a distance of 5 mm according to 5) in section 4.1 is applied to determine SAR test exclusion.

Freq. (MHz)	Field strength (mV/dB)(V/m)	ERP (max) (dBm)	Turn-on Power (dB)	Max time power (dBm) (s)
2450MHz	99.64	4.38	3.5.1.1	4.5

**Note:**

- ① ERP: Max value
- ② E: electric field strength in dB/mV
- ③ ERP: electric field strength in dB/mV
- ④ D: specific absorption rate (SAR)

ERP:E-124E-2000,0.0
