Maintenance

Regular maintenance helps extend the life of your bedding set:

- **Regular Washing:** Wash the bedding set regularly according to the care instructions to keep it fresh and clean.
- **Storage:** When not in use, store the bedding in a cool, dry place away from direct sunlight to prevent fading and damage.
- **Inspection:** Periodically inspect the seams and fabric for any signs of wear or damage. Address minor

issues promptly to prevent them from worsening.

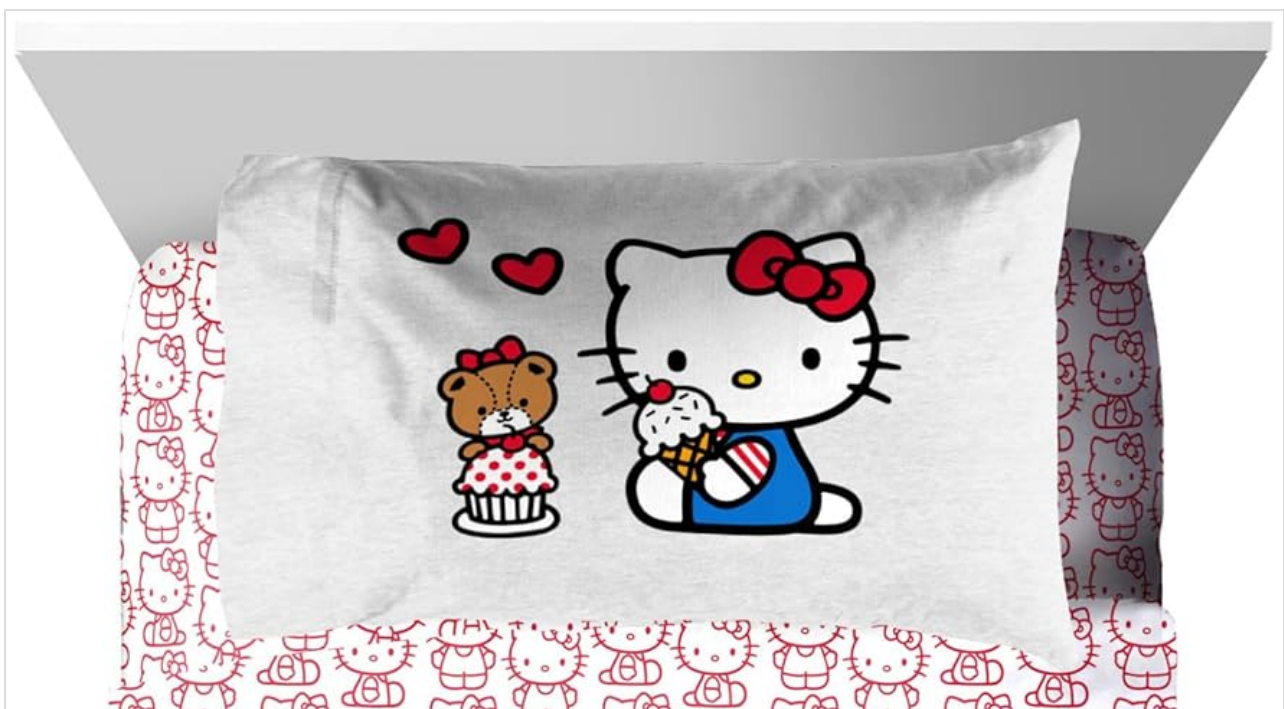

Troubleshooting

Here are solutions to common issues you might encounter:

- **Wrinkles:** If the bedding appears wrinkled after washing, remove it from the dryer immediately after the cycle finishes. You may also use a low-heat iron if needed.
- **Fading Colors:** To minimize color fading, always wash in cold water and avoid direct prolonged exposure to strong sunlight during drying or storage.
- **Pilling:** Pilling can occur with microfiber over time. To reduce pilling, wash the bedding inside out and avoid harsh detergents or fabric softeners that can break down fibers.
