- Wipe the exterior with a soft, damp cloth. Do not use abrasive cleaners or scouring pads.
- Ensure the power base and electrical connections remain dry.

### 6.2 Descaling

efficiency.

- Fill the kettle with a mixture of white vinegar and water (1:2 ratio) or a commercial descaling solution.
- Boil the mixture and let it stand for at least 30 minutes, or longer for heavy buildup.
- Pour out the mixture and rinse the interior thoroughly with fresh water several times.
- If necessary, repeat the process.
