## Comfyer B0DP46X3CT

# Comfyer Baby Bottle Warmer & Sterilizer Instruction Manual

Brand: Comfyer

Model: B0DP46X3CT

## INTRODUCTION

---

The Comfyer Baby Bottle Warmer & Sterilizer is designed to simplify feeding preparation for infants. This versatile device offers multiple functions including rapid bottle warming, milk thawing, and sterilization of baby essentials. It maintains a constant temperature for extended periods, ensuring warm water is always available for formula preparation.

## PRODUCT COMPONENTS

---

The Comfyer Baby Bottle Warmer & Sterilizer consists of the main heating unit, a glass kettle with a handle, and a steaming basket. The glass kettle features measurement markings for precise water levels.

## SETUP

---

1. **Unpack:** Carefully remove all components from the packaging.
2. **Clean:** Before first use, wash the glass kettle and steaming basket with warm, soapy water. Rinse thoroughly and dry. Wipe the main unit with a damp cloth. Do not immerse the main unit in water.
3. **Placement:** Place the unit on a stable, flat, heat-resistant surface away from direct sunlight and heat sources.
4. **Power Connection:** Plug the power cord into a suitable electrical outlet.

## OPERATING INSTRUCTIONS

---

### 1. Rapid Bottle Warming

This function quickly warms baby bottles to the desired temperature.

1. Fill the glass kettle with the appropriate amount of water based on the bottle size.
2. Place the baby bottle into the steaming basket, then lower the basket into the kettle.
3. Select the "Fast Warming" mode on the control panel. The device will quickly heat the water to warm the bottle.
4. Once complete (approximately 30 seconds for optimal temperature), carefully remove the bottle. Always test the milk temperature before feeding.

### 2. Sterilizing Bottles, Pacifiers, and Teethers

The sterilizing function uses steam to effectively sanitize baby items.

1. Add approximately 250-300mL of water to the main unit.
2. Place the clean bottles, pacifiers, or teethers into the steaming basket.
3. Cover with the lid and turn on the power. Select the "Steam" or "Sterilize" function.

4. The steaming process will complete in approximately 15 minutes. Allow items to cool before handling.

### 3. Thawing Breast Milk

This function allows for gentle and quick thawing of frozen breast milk.

1. Add approximately 800-1000mL of water to the main unit.
2. Place the frozen breast milk bag or container into the steaming basket.
3. Turn on the power and select the "Thaw" or "Heat" button. Set the desired temperature.
4. Thawing typically takes 3-5 minutes.

## 4. 72-Hour Keep Warm Function

The device can maintain a set water temperature for up to 72 hours, providing instant access to warm water for formula.

- Fill the glass kettle with water and select the "Keep Warm" function.
- Adjust the desired temperature using the controls. The bright LED display indicates the current temperature.
- The device will automatically shut off if the water level becomes too low.

## 5. Night Light Feature

A built-in night light provides convenience for nighttime feedings.

- The night light automatically turns on when the kettle is lifted from the base.
- This feature allows for easy visibility without needing to turn on bright room lights.

# Night Light Makes Night Feeding A Breeze!

The image shows a woman sitting up in bed at night, feeding a baby with a bottle. To her left, on a wooden bedside table, sits a white Comfyer Baby Bottle Warmer. The warmer has a digital display and several buttons. A small inset image shows the warmer with its lid removed, and a night light icon is visible on the base, labeled "Night light".

## COMPATIBILITY

The Comfyer Baby Bottle Warmer is designed to accommodate most standard baby bottles.

- The inner height of the steaming basket is approximately 7.08 inches.
- The inner diameter is approximately 3.74 inches.

- Most traditional 240ml glass bottles (after removing the pacifier) will fit comfortably.

## CLEANING AND MAINTENANCE

- **Daily Cleaning:** After each use, empty any remaining water. Wash the glass kettle and steaming basket with warm, soapy water and rinse thoroughly.
- **Descaling:** Mineral deposits may accumulate over time. To descale, fill the kettle with a 1:1 mixture of water and white vinegar or lemon juice. Run the "Boil" cycle for 1 minute, then let the solution sit for 15 minutes. Empty the solution, rinse thoroughly, and wipe dry.

- **Exterior:** Wipe the exterior of the main unit with a soft, damp cloth. Do not use abrasive cleaners or immerse the unit in water.
- **Dishwasher Safety:** The glass kettle and steaming basket are not dishwasher safe. Hand wash only.
