› Replacement Heads for Eyebrow Facial Trimmer: Original Heads Replacement Set for 2 in1 Facial Eyebrow Trimmer - Suitable for Model VG-102, VG-1023, VG-1024

VG VOGCREST VG-1026

Instruction Manual for VG VOGCREST Trimmer Replacement Heads

Model: VG-1026 (Compatible with VG-102, VG-1023, VG-1024)

PRODUCT OVERVIEW

This instruction manual provides essential information for the proper use and maintenance of your VG VOGCREST Replacement Heads for Facial and Eyebrow Trimmers. These original equipment manufacturer (OEM) replacement heads are specifically designed to ensure a perfect fit and optimal performance with VG VOGCREST trimmer models VG-102, VG-1023, and VG-1024.

The set includes replacement heads for both facial hair removal and eyebrow trimming, along with a cleaning brush and charging cable, ensuring your device remains in excellent working condition.

Fit for VG VOGCREST Facial Eyebrow Trimmer Only.

Not Match with Other Brands/Products.

Image: This image illustrates the specific compatibility of these replacement heads with VG VOGCREST facial eyebrow trimmers (models VG-102, VG-1023, VG-1024) and explicitly states they are not compatible with other brands or products.

SETUP AND INSTALLATION

Replacing the trimmer heads is a straightforward process designed for quick and easy installation. Ensure your trimmer is turned off before attempting to change any heads.

1. **Remove the Old Head:** Gently twist or pull the existing trimmer head counter-clockwise until it detaches from the main body of the trimmer.
2. **Select the New Head:** Choose the appropriate replacement head (facial or eyebrow) for your grooming needs.
3. **Install the New Head:** Align the new head with the trimmer body and twist it clockwise until it clicks securely into place. Ensure it is firmly attached to prevent misalignment during use.

Image: This composite image highlights key features: the ease of changing heads, the 360-degree no-blind-spot design for thorough trimming, and the simplicity of cleaning the heads under running water.

OPERATING INSTRUCTIONS

Once the desired replacement head is securely installed, your trimmer is ready for use. These heads are designed for safe, painless, and skin-friendly trimming.

- **Facial Hair Removal:** For facial hair, gently glide the facial replacement head over the skin in small, circular motions. The titanium-plated, double-ring design ensures efficient and smooth hair removal without irritation.
- **Eyebrow Trimming:** For eyebrows, use the eyebrow trimmer head. Carefully shape and trim unwanted hairs by moving the trimmer against the direction of hair growth.
- The advanced design of these heads allows for instant hair removal, providing a clean and smooth finish with 360-degree coverage to eliminate blind spots.

VG VOGCREST VS OTHERS

Image: A comparison showcasing the superior design of VG VOGCREST heads, featuring a double-ring blade system and multiple cutting holes, contrasted with single-ring and fewer-hole designs found in other products, emphasizing enhanced efficiency and coverage.

MAINTENANCE AND CLEANING

Regular cleaning of your trimmer heads is crucial for maintaining optimal performance and hygiene. The heads are designed for easy cleaning.

1. **Detach the Head:** After each use, turn off the trimmer and detach the head as described in the "Setup and Installation" section.
2. **Brush Cleaning:** Use the provided cleaning brush to remove any trapped hairs or debris from the blades and the inside of the head.
3. **Rinse (if applicable):** Some heads may be rinseable under running water. Refer to your original trimmer manual for specific water resistance guidelines. Ensure the head is completely dry before reattaching or storing.
4. **Storage:** Store the replacement heads in a clean, dry place, preferably in their original packaging or a protective case, to prevent damage and maintain sharpness.

TROUBLESHOOTING

If you encounter issues with your replacement heads, consider the following:

- **Head Not Fitting Securely:**
 - Ensure you have the correct replacement heads for your specific VG VOGCREST trimmer model (VG-102, VG-1023, VG-1024).
 - Verify that the head is aligned correctly with the trimmer body and twisted firmly into place.
- **Reduced Trimming Performance:**
 - Clean the head thoroughly to remove any accumulated hair or debris that might be impeding the blades.
 - Ensure the trimmer's battery is sufficiently charged (if applicable to your trimmer model).
 - If performance remains poor after cleaning and proper installation, the head may have reached the end of its lifespan and require replacement.
- **Skin Irritation:**
 - Ensure your skin is clean and dry before trimming.
 - Apply gentle pressure and move the trimmer slowly.
 - If irritation persists, discontinue use and consult a dermatologist.
