5. MAINTENANCE

Proper care and maintenance will ensure the longevity of your Tcamgoi building bricks.

- **Cleaning:** To clean the bricks, wipe them with a damp cloth and mild soap. Rinse thoroughly with water and allow them to air dry completely before storage. Avoid using harsh chemicals or abrasive cleaners.
- **Storage:** Store the bricks in a dry, cool place away from direct sunlight to prevent discoloration or warping. The original packaging or a dedicated storage container is recommended to keep all pieces together.
- **Handling:** While durable, avoid excessive force when connecting or disconnecting bricks to prevent damage.

6. TROUBLESHOOTING

If you encounter any issues with your Tcamgoi building bricks, consider the following common solutions:

- **Blocks Not Fitting Together:** Ensure the studs and holes are properly aligned. Apply firm, even pressure. If a block is visibly warped or damaged, it may need to be replaced.
- **Missing Pieces:** Carefully check all packaging materials. If pieces are genuinely missing upon arrival, please contact customer service.
- **Difficulty Separating Blocks:** Some connections may be tight. A specialized brick separator tool (not included in this set but available separately from many building block brands) can assist in separating stubborn bricks.
- **Discoloration:** Prolonged exposure to direct sunlight can cause plastic to discolor. Store blocks in a shaded area.
