TROUBLESHOOTING

Desk feels wobbly after assembly.

Ensure all screws and connections are fully tightened. Verify that the desk is placed on a level surface. If wobbling persists, re-check the assembly steps, especially for the main frame and anti-tipping device.

Folding desktop does not stay open.

Check the folding mechanism to ensure it is fully engaged and locked into place. Inspect for any obstructions or damage to the hinges or support arms.

Drawers are difficult to open or close.

Ensure the drawer slides are correctly installed and aligned. Check for any obstructions inside the drawer or along the slides. Lubrication of the slides with a suitable product may help.
