Dorman 57652

Dorman 57652 Passenger Side Door Mirror Glass Instruction Manual

Model: 57652

PRODUCT OVERVIEW

This Dorman 57652 passenger side door mirror glass is engineered as a direct replacement for specific Jeep models. It features a heated element and a blind spot indicator, designed to match the original equipment's form, fit, and function. This component allows for the replacement of only the mirror glass, rather than the entire mirror assembly, offering a cost-effective repair solution.

Compatibility: Jeep Cherokee (2014-2023).

Figure 1: Front view of the Dorman 57652 mirror glass, showing the reflective surface, integrated heating element icon, and blind spot indicator. The text "OBJECTS IN MIRROR ARE CLOSER THAN THEY APPEAR" is visible.

WHAT'S INCLUDED

- 1 x Dorman 57652 Passenger Side Door Mirror Glass
- 1 x Mounting Clip

INSTALLATION INSTRUCTIONS

This mirror glass is designed for direct replacement. Ensure your vehicle's make, model, and year are compatible before proceeding with installation. Refer to your vehicle's service manual for specific mirror removal and installation procedures if detailed steps are required beyond these general guidelines.

Tools Required (Typical):

- Plastic trim removal tool
- Screwdriver (Phillips or flathead, as needed)
- Gloves (optional, for handling glass)

Step-by-Step Procedure:

1. **Preparation:** Park the vehicle on a level surface and turn off the ignition. For safety, it is recommended to disconnect the vehicle's battery, especially if working with electrical components.
2. **Remove Old Mirror Glass:** Carefully pry the old, damaged mirror glass from its housing. This often involves gently prying around the edges with a plastic trim removal tool. Be cautious of any broken glass.
3. **Disconnect Wiring:** If your vehicle's mirror has heating or blind spot indicator functions, there will be electrical connectors attached to the back of the mirror glass. Carefully disconnect these wires. Note their orientation if necessary.
4. **Inspect Housing:** Clean any debris from the mirror housing and inspect the mounting points for damage.
5. **Connect New Mirror Glass:** Connect the electrical wires from the vehicle to the corresponding terminals on the back of the new Dorman 57652 mirror glass. Ensure a secure connection.

Figure 2: Rear view of the Dorman 57652 mirror glass, illustrating the integrated heating elements, electrical connection points, and mounting clips.

6. **Install New Mirror Glass:** Align the new mirror glass with the mounting points in the mirror housing. Apply firm, even pressure to snap the new glass into place. You should hear a click as the clips engage.
7. **Test Functionality:** Reconnect the vehicle's battery (if disconnected). Turn on the ignition and test the mirror's adjustments, heating function (if applicable), and blind spot indicator to ensure proper operation.

OPERATING INSTRUCTIONS

Once installed, the Dorman 57652 mirror glass operates in conjunction with your vehicle's existing mirror system. The heated function typically activates automatically with the rear defroster or a dedicated mirror heat button, depending on your vehicle's specific features. The blind spot indicator will function as designed by the vehicle manufacturer, illuminating when a vehicle is detected in your blind spot.

The phrase "OBJECTS IN MIRROR ARE CLOSER THAN THEY APPEAR" is a standard safety warning on passenger side mirrors, indicating that the convex shape of the mirror provides a wider field of view but distorts distance perception.

MAINTENANCE AND CARE

To ensure the longevity and clarity of your Dorman 57652 mirror glass, follow these simple maintenance guidelines:

- **Cleaning:** Clean the mirror surface with a soft, lint-free cloth and a standard automotive glass cleaner. Avoid abrasive cleaners or materials that could scratch the glass.
- **Inspection:** Periodically inspect the mirror for cracks, chips, or signs of delamination. Address any damage promptly to maintain visibility and safety.
- **Wiring:** Ensure that the electrical connections on the back of the mirror remain secure and free from corrosion.

TROUBLESHOOTING

If you experience issues with your Dorman 57652 mirror glass after installation, consider the following troubleshooting steps:

- **Mirror Not Heating:**
 - Check electrical connections at the back of the mirror for looseness or corrosion.
 - Verify that the vehicle's heating system (e.g., rear defroster) is active and functioning correctly.

- Consult a professional mechanic if the issue persists, as it may indicate a problem with the vehicle's wiring or heating circuit.
- **Blind Spot Indicator Not Working:**
 - Ensure all electrical connections are secure.
 - This function relies on the vehicle's blind spot monitoring system. If the indicator is not working, it may be an issue with the vehicle's sensors or system, not the mirror glass itself. Consult your vehicle's owner's manual or a qualified technician.
- **Mirror Loose in Housing:**
 - Gently press on the edges of the mirror glass to ensure it is fully seated and all mounting clips are engaged.
 - Inspect the mirror housing for any damage that might prevent proper seating.

SPECIFICATIONS

Brand	Dorman
Model Number	57652
Part Position	Passenger Side
Features	Heated, Blind Spot Indicator Compatible
Dimensions (L x W x H)	8.86 x 6.3 x 2.17 inches
Item Weight	7.6 ounces
OEM Part Numbers	68228918AA; 68228918AB
Fit Type	Vehicle Specific Fit
UPC	194883680173

WARRANTY AND SUPPORT

For information regarding product warranty, returns, or technical support, please refer to the official Dorman Products website or contact their customer service directly. Keep your purchase receipt as proof of purchase.
