1.2 Initial Placement and Power

Place the projector on a stable, flat surface. Connect the power adapter to the projector's power port and then to an electrical outlet. The projector is designed for portability and can be used in various indoor and outdoor settings.

1.3 Connecting Devices

The projector includes multiple connection ports:

- **USB Ports:** For connecting USB drives to access media files.
- **HDMI Port:** For connecting external devices such as TV sticks, laptops, and gaming consoles.
- **3.5mm Headphone Jack:** For connecting external audio devices like headphones or speakers.

2. OPERATING INSTRUCTIONS

2.1 Powering On/Off

Press the power button on the projector or the remote control to turn the device on or off. Allow a few moments for the system to boot up.

2.2 Auto Focus and Keystone Correction

The X5 projector features automatic focus and keystone correction. When the projector is moved or powered on, it will automatically adjust the image for optimal clarity and a rectangular display. Manual adjustments are also possible if needed.

3. MAINTENANCE

3.1 Cleaning the Projector

To maintain optimal performance, regularly clean the projector's lens and vents. Use a soft, dry cloth for the exterior. For the lens, use a lens cleaning cloth and solution designed for optical surfaces. Ensure the projector is powered off and unplugged before cleaning.

3.2 Software Updates

The smart operating system supports online updates. Periodically check for and install available updates to ensure your projector has the latest features and performance enhancements. Navigate to the settings menu to find the update option.

4. TROUBLESHOOTING

4.1 Common Issues and Solutions

No Image Displayed:

Ensure the projector is powered on and connected correctly to a power source. Check the input source selection (HDMI, USB) to match your connected device. Verify that the lens cap is removed.

Blurry Image:

Allow the auto-focus function to complete. If the image remains blurry, try moving the projector slightly to re-trigger auto-focus or check for any obstructions near the lens.

No Sound:

Check the volume settings on the projector and any connected source device. Ensure external speakers are properly connected and powered on if used. Verify Bluetooth connection if streaming audio wirelessly.

Remote Control Not Responding:

Replace the batteries in the remote control. Ensure there are no obstructions between the remote and the projector's IR receiver.

Cannot Connect to WiFi:

Ensure your WiFi network is active and within range. Re-enter the WiFi password carefully. Try restarting both the projector and your router.
