Lamshaw M308

Lamshaw Screen Protector for Oilsky M308 2.8-inch HiFi MP3 Player - Instruction Manual

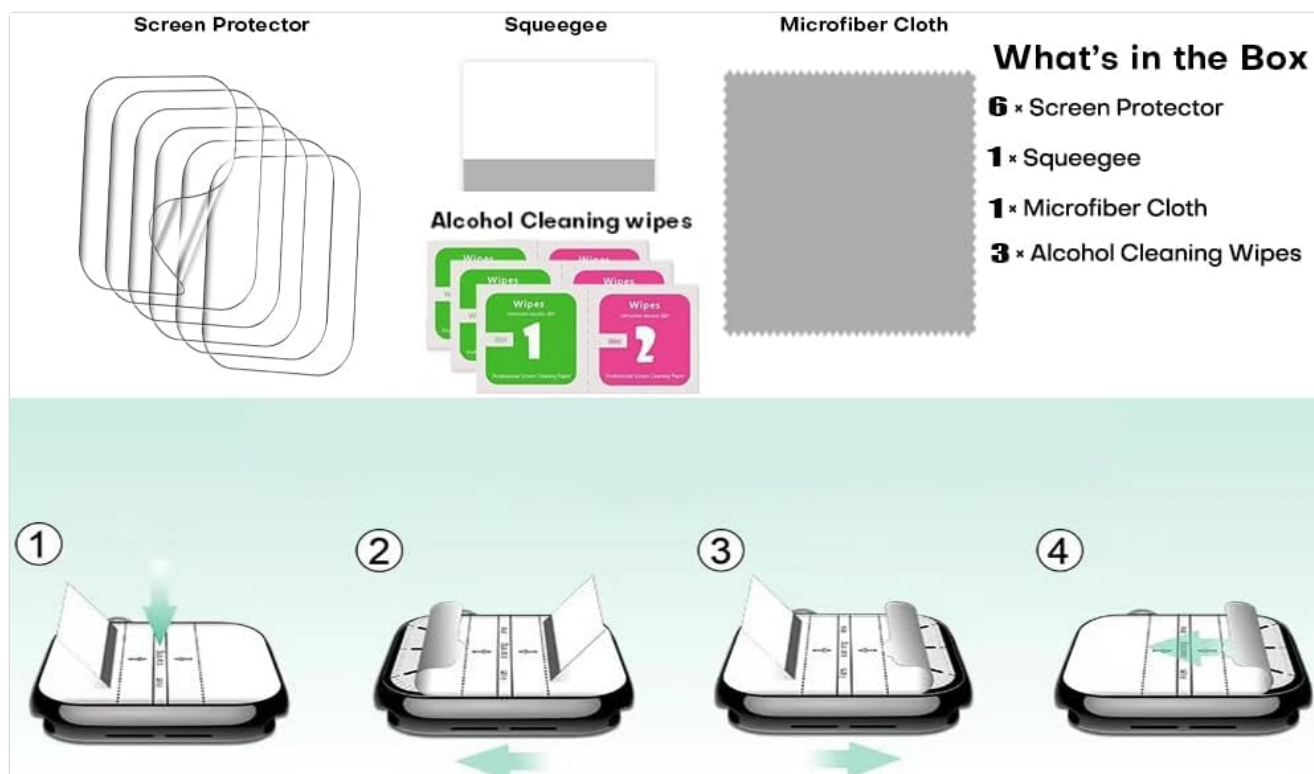

1. INTRODUCTION

This manual provides detailed instructions for the installation and maintenance of your Lamshaw Full Coverage TPU Clear Film Screen Protector, designed specifically for the Oilsky M308 2.8-inch HiFi MP3 Player. Proper application ensures optimal screen protection and functionality.

2. PACKAGE CONTENTS

The Lamshaw Screen Protector package typically includes the following items:

- 6 x Screen Protectors
- 1 x Squeegee
- 1 x Microfiber Cloth
- 3 x Alcohol Cleaning Wipes (Wet & Dry)
- Dust Absorber Stickers

3. KEY FEATURES

- **Full Coverage:** Designed to cover the entire screen of the Oilsky M308.
- **Soft TPU Material:** Provides flexibility and durability.
- **Anti-Shatter & Anti-Scratch:** Protects the device screen from impacts and abrasions.
- **High Transparency & High Sensitivity:** Maintains original screen clarity and touch responsiveness.
- **Bubble Self-Healing:** Minor bubbles and scratches may disappear within 24 hours.
- **Oleophobic Coating:** Helps resist smudges and oil residue.

4. SETUP & INSTALLATION

Follow these steps carefully for optimal screen protector application:

1. **Clean the Screen:** Use the provided alcohol cleaning wipes (Step 1: Wet, Step 2: Dry) and microfiber cloth to thoroughly clean the Oilsky M308 screen. Ensure no dust, smudges, or fingerprints remain.
2. **Remove Dust:** Use the dust absorber sticker to pick up any remaining dust particles from the screen surface.
3. **Prepare the Protector:** The screen protector has three layers. Carefully peel off the red-labeled "Back 1" layer. This exposes the adhesive side that will attach to your screen.
4. **Align and Apply:** Carefully align the screen protector with the edges of your Oilsky M308 screen. Once aligned, gently lay it down onto the screen.
5. **Remove Bubbles:** Use the provided squeegee card to gently push out any air bubbles towards the edges of the screen. For larger bubbles, you may need to carefully lift a corner of the protector and reapply, pushing the bubble out.
6. **Final Peel:** Once the protector is smoothly applied and bubbles are removed, peel off the black-labeled "Front 2" layer. The middle layer is the actual screen protector.

5. OPERATING (USAGE)

The Lamshaw screen protector is designed to maintain the original touch sensitivity of your Oilsky M308 MP3 Player. After proper installation, you should experience:

- **Uninterrupted Touch Response:** The screen will respond quickly and accurately to your touch inputs.
- **Clear Visuals:** High transparency ensures that the display quality and colors of your device remain vibrant and true.

Original Touch Response

Responds quickly without any lag or mistake

Figure 4: The screen protector maintains original touch response.

6. MAINTENANCE & CARE

To ensure the longevity and effectiveness of your screen protector, follow these care guidelines:

- **Regular Cleaning:** Use a soft, lint-free microfiber cloth to gently wipe the screen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, alcohol (other than the provided wipes for initial cleaning), or solvents, as these can damage the oleophobic coating or the protector itself.
- **Oleophobic Coating:** The special oleophobic coating helps repel oils and fingerprints. Regular gentle cleaning will maintain its effectiveness.

Special Oleophobic Coating

Keep clean and clear against smudges and oil residue

Figure 5: The oleophobic coating repels water and oils.

7. TROUBLESHOOTING

- **Bubbles After Installation:**

- **Minor Bubbles:** The TPU material has self-healing properties. Small bubbles may disappear naturally within 24 hours.
- **Persistent Bubbles:** Use the squeegee card to push bubbles towards the nearest edge. If a bubble is large and cannot be pushed out, carefully lift the nearest edge of the protector and reapply, ensuring to push the air out as you lay it back down.

- **Protector Not Sticking:** Ensure the screen was thoroughly cleaned and free of dust and oils before application. The middle layer of the protector is the sticky part; ensure you peeled off the correct "Back 1" layer first. If you accidentally peeled "Front 2" first, the side to "Front 2" may not be sticky. In this situation, gently wrinkle the red "Back 1" layer, separate it to two layers, peel off the middle layer, let it go back to black "Front 1", then install to screen.

Automatic Repair

The self-healing technology constantly eliminates minor scratches and bubbles within 24hrs.
