

PHILIPS ADD5902WH2/37

PHILIPS Water Filter Pitcher

MODEL: ADD5902WH2/37

Introduction

Thank you for choosing the PHILIPS Water Filter Pitcher. This rechargeable water dispenser is designed to provide clean, great-tasting water by reducing over 40 impurities, including 99% of lead, and is certified to NSF/ANSI standards 42, 53, and 372. Its compact design makes it ideal for various settings, from your kitchen to your RV. This manual will guide you through the setup, operation, and maintenance of your new water filter pitcher.

Note: This system does not lower TDS value. If you prefer a low TDS value, please consider a PHILIPS RO system.

What's in the Box

Upon opening your package, please ensure all the following items are present:

- 1 x Electric Water Filter Pitcher
- 2 x Plus-Filters (Model NO.: ADD566)
- 1 x User Manual
- 1 x Charging Cable (Type C USB)

Setup

1. **Prepare the Filter:** Before first use, soak the new filter in water for 5 minutes. This primes the filter for optimal performance.
2. **Insert the Filter:** Open the top cover of the pitcher. Insert the new filter into its designated slot and twist clockwise until it is securely in place.
3. **Charge the Pitcher:** Connect the provided Type C USB charging cable to the charging port on the pitcher. Use the original charging cable for charging. Do not use a USB C to USB C cable or

charge via a computer/laptop. The built-in battery offers up to 30 days of filtration per charge.

4. **Initial Rinse:** Fill the pitcher with tap water and dispense the first full pitcher of water. Discard this water to flush out any carbon dust from the new filter.

Easy filter replacement

Step 1
Soak the new filter in water for 5 minutes.

Step 2
Open the top cover and unscrew the old filter by turning it counter-clockwise to remove.

Step 3
Insert the new filter, twist clockwise until secure, and replace the top cover.

Step 4
Enjoy great tasting and fresh water.

Operating Instructions

The PHILIPS Water Filter Pitcher is designed for ease of use and convenience.

- **Filling the Pitcher:** The pitcher features a flip-top lid for effortless single-handed refills. Simply open the lid and fill the reservoir with tap water. The 12-cup capacity allows for a large volume of water to be filtered at once.
- **Dispensing Water:** To dispense filtered water, simply press the button located on the top of the pitcher. The pitcher provides instant filtration on demand.
- **Placement:** Its compact dimensions (9.2 x 6 x 10.3 inches) allow it to easily fit in your fridge door or on any countertop.

**Set it up anywhere,
with built-in battery**

On the desk, or in the fridge door rack

Maintenance

Regular maintenance ensures the longevity and effectiveness of your PHILIPS Water Filter Pitcher.

- **Filter Replacement:** Each filter lasts up to 3 months or 60 gallons, based on estimated average daily water consumption of 10 cups. The innovative usage-based filter monitoring system calculates filter life and alerts you when replacement is needed.
- **Cleaning:** The pitcher is made of food-grade, BPA-free materials. Clean the pitcher components (excluding the electronic head) with mild soap and water. Do not submerge the electronic head in water. The pitcher features an IPX4 splash-proof design for protection against water exposure during normal use.

Filter Lifetime Indicator:

The indicator light on the pitcher provides clear status updates:

- **Green Light:** Dispensing water.
- **Flashing Yellow Light:** Battery is low.
- **Constant Yellow Light:** Battery charge is complete.
- **Flashing Red Light:** Filter needs to be replaced soon.

- **Constant Red Light:** Filter has expired. Replace the filter immediately.

Troubleshooting

If you encounter any issues with your PHILIPS Water Filter Pitcher, please refer to the following common solutions:

Problem	Possible Cause	Solution
No water dispenses or slow flow.	Low battery, clogged filter, or airlock.	Check battery indicator and charge if necessary. Replace filter if red light is on. Ensure filter is properly seated.
Water tastes unusual after filter replacement.	New filter not properly rinsed.	Discard the first full pitcher of filtered water after installing a new filter.
Pitcher not charging.	Incorrect charging cable or power source.	Ensure you are using the original Type C USB charging cable provided. Do not use USB C to USB C cables or charge via computer/laptop.
Filter indicator light is red.	Filter has expired or is nearing end of life.	Replace the filter immediately if the light is constant red, or soon if flashing red.

If the problem persists after attempting these solutions, please contact PHILIPS customer service for further assistance.

Specifications

- **Model Name:** ADD5902WH2/37
- **Product Dimensions:** 9.17"L x 5.98"W x 10.35"H (230mm x 152mm x 263mm)
- **Item Weight:** 1 Kilogram (2.2 Pounds)
- **Power Source:** Battery Powered (1 Lithium Ion battery included)
- **Installation Type:** Countertop

- **Maximum Flow Rate:** 1 Liters Per Minute
- **Special Features:** Portable, Change Filter Indicator, Leak Proof, Rechargeable, Instant Filtration
