## 4. SETUP AND ASSEMBLY INSTRUCTIONS

Assembly of the SINGAYE 6-Tier Wire Storage Shelf is designed to be tool-free and straightforward. Follow these steps for proper installation:

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, flat surface. Verify that all listed components are present.
2. **Assemble Vertical Poles:** Connect the pole segments to form four complete vertical poles. Ensure they are securely joined.
3. **Attach Leveling Feet:** Screw the adjustable leveling feet into the bottom of each pole.
4. **Install Plastic Clips:** Determine the desired height for your bottom shelf. Snap the plastic clips onto the grooves of each vertical pole at the same height. Ensure the arrows on the clips point upwards and they click securely into place.
5. **Place First Shelf:** Slide the first wire shelf down over the poles until it rests firmly on the installed plastic clips. Apply even pressure to ensure it is level and stable.
6. **Repeat for Remaining Shelves:** Repeat step 4 and 5 for the remaining five shelves, adjusting the height of the plastic clips as needed for your desired spacing.
7. **Final Check:** Once all shelves are in place, gently press down on each corner of every shelf to ensure they are fully seated and stable. Adjust the leveling feet if the unit wobbles.

## 6. MAINTENANCE

To ensure the longevity and appearance of your SINGAYE 6-Tier Wire Storage Shelf, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the shelves and poles with a damp cloth as needed. Avoid abrasive cleaners that could damage the finish.
- **Avoid Overloading:** Do not exceed the maximum weight capacity of 720 pounds for the entire unit, or individual shelf limits (if specified, though not explicitly stated per shelf, it's good practice to distribute weight).
- **Keep Dry:** While rustproof, prolonged exposure to excessive moisture should be avoided to maintain optimal condition.

## 7. TROUBLESHOOTING

If you encounter any issues during assembly or use, refer to the following common solutions:

- **Wobbly Unit:** Ensure all shelves are securely seated on their plastic clips. Adjust the leveling feet at the bottom of the poles to stabilize the unit on uneven floors.
- **Shelves Not Level:** Double-check that the plastic clips for each shelf are snapped onto the same groove height on all four vertical poles.
- **Difficulty Assembling Poles/Shelves:** Ensure plastic clips are correctly oriented (arrows pointing up) and fully clicked into the pole grooves. A rubber mallet (not included) can be used gently to tap shelves into place if needed, but avoid excessive force.
- **Missing Parts:** If any components are missing from your package, please contact SINGAYE customer support immediately.
