2. KEY FEATURES

- **Hybrid-Glass Technology:** Combines flexibility with glass-like hardness.
- **9H Extreme Hardness:** Provides strong scratch resistance.
- **Ultra-Thin & Light:** 2x thinner and lighter than typical tempered glass.
- **High Transparency:** Ensures clear and sharp display visibility.
- **Anti-Fingerprint Layer:** Reduces smudges and fingerprints.
- **Bubble-Free Installation:** Optimized adhesive for easy application.

3. INSTALLATION GUIDE

Follow these steps carefully for a bubble-free installation of your screen protector.

1. **Prepare the Environment:** Locate a dust-free area, such as a bathroom after a hot shower. Thoroughly clean the smartwatch screen to remove any dust, dirt, or smudges.
2. **Position the Protector:** Carefully peel off half of the backing film (labeled "1") from the screen protector. Align the exposed adhesive side with one edge of your smartwatch screen. Ensure the protector is centered.
3. **Apply and Smooth:** Using a credit card or a soft cloth, slowly and carefully smooth the screen protector from the aligned edge towards the other side, gradually peeling off the remaining backing film (labeled "2") as you go. This helps prevent air bubbles.
4. **Remove Air Bubbles:** If any air bubbles remain, gently push them towards the edges of the screen using a credit card wrapped in a soft cloth.

Instructions in various languages can be found inside.

 Anbringungsanleitung

 Instructions

1.

Nutze zur Montage einen staubarmen Ort (z.B. Badezimmer) und reinige das Display gründlich von Staub und Verschmutzungen.

Before assembling, locate a dust free area (e.g. bathroom) and carefully remove any dust or dirt from the display.

2.

Löse das Trägermaterial zur Hälfte von der Displayschutzfolie ab und setze die Displayschutzfolie an einer Seite auf dem Display an. Die Displayschutzfolie sollte in aufgezogenem Zustand mittig auf dem Display ausgerichtet sein.

Remove half of the thin cover film of the screen protector and align the screen protector on one side with your screen. Make sure that the screen protector will be centered on the middle of your screen.

3.

Streiche die Displayschutzfolie leicht mittels einer mit einem weichen Tuch umwickelten Kreditkarte von einer Seite zur anderen auf das Display. Ziehe dabei gleichzeitig den Rest des Trägermaterials ab.

Cover a credit card with a soft cloth and carefully slide over the screen protector from one side to the other on your screen, enabling you to remove the rest of the thin cover film.

4.

Eventuell vorhandene Luft einschüsse herausstreichen - fertig!

Smooth out any remaining air bubbles with your credit card. It's that easy!

4. MAINTENANCE AND CARE

To ensure the longevity and clarity of your protect AirGlass screen protector:

- Clean the screen protector regularly with a soft, lint-free cloth.
- For stubborn smudges, lightly dampen the cloth with water or a screen cleaner designed for electronics.
- Avoid using harsh chemicals, abrasive materials, or excessive force when cleaning.
- While the protector is scratch-resistant, avoid contact with sharp objects to prevent damage.

5. TROUBLESHOOTING

5.1. Air Bubbles After Installation

If you notice small air bubbles after installation:

- **Small Bubbles:** Many small bubbles will naturally disappear within 24-48 hours as the adhesive fully cures.
- **Large Bubbles:** Gently push larger bubbles towards the nearest edge using a credit card wrapped in a soft cloth. Apply steady, even pressure.
- **Dust Particle:** If a bubble is caused by a dust particle, it may be necessary to carefully lift the nearest edge of the protector with a piece of tape, remove the dust with another piece of tape, and then

reapply. Exercise caution to avoid damaging the adhesive.

5.2. Protector Not Sticking Properly

Ensure the screen was thoroughly cleaned before application. Any dust, oil, or residue can prevent proper adhesion. Re-clean the screen and attempt re-application if possible, or use a new protector from the pack.

6. SPECIFICATIONS

Product Type	Hybrid-Glass Screen Protector
Compatibility	Maoo Titan Smartwatch 1.43"
Hardness	9H (Extreme Hardness)
Thickness	2x thinner than ordinary tempered glass
