## GEARit GI-CAM-DRB-WH-001

# GEARit Smart Video Doorbell Camera User Manual

Model: GI-CAM-DRB-WH-001 | Brand: GEARit

## INTRODUCTION

Thank you for choosing the GEARit Smart Video Doorbell Camera. This wireless doorbell camera provides advanced security features including 2K QHD video resolution, motion detection, two-way audio, and a long-lasting rechargeable battery. Designed for easy setup and reliable performance, it ensures you stay connected to your home's entryway. This manual provides detailed instructions for setting up, operating, and maintaining your new doorbell camera. Please read it thoroughly before use to ensure proper functionality and safety.

## PRODUCT FEATURES

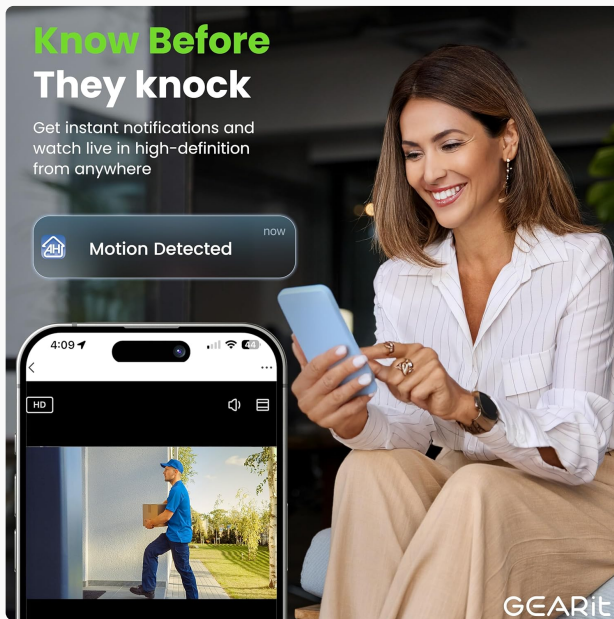

### 2K QHD Video Resolution

Capture every detail with razor-sharp 2K QHD (4MP) resolution. This ensures clear and crisp video footage, allowing for better identification of visitors and events

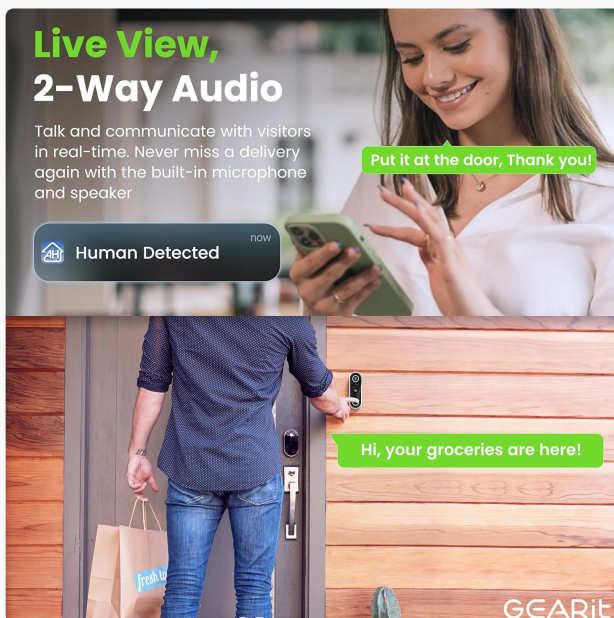

at your doorstep, day or night.

## Motion & Sound Detection

Receive real-time push alerts on your smartphone when motion or sound is detected. This feature helps you stay informed about activity at your front door, enhancing your home security.

## Two-Way Audio Communication

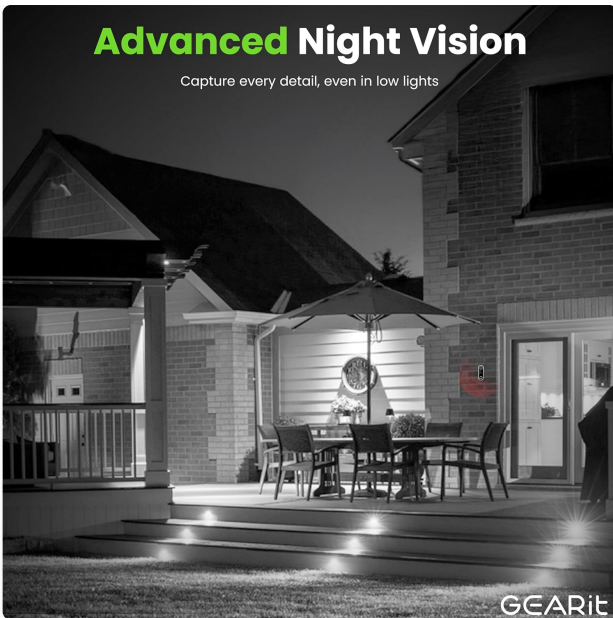

Communicate directly with visitors, delivery personnel, or family members at your door using the built-in microphone and speaker. This allows for convenient and secure interaction from anywhere.

## Advanced Night Vision

## Advanced Night Vision

Capture every detail, even in low lights

Equipped with advanced night vision capabilities, the doorbell camera provides clear visibility even in complete darkness, ensuring continuous monitoring and security around the clock.

## IP64 Weatherproof Design

### IP64 Weatherproof Protection

Built to withstand dust, rain, and splashes—ideal for year-round outdoor protection

The doorbell camera is built with an IP64 weatherproof rating, making it resistant to dust, rain, and splashes. This ensures reliable operation in various outdoor conditions throughout the year.

## Rechargeable Battery & Local Storage

### Product Overview Video

Your browser does not support the video tag.

This video provides a brief overview of the GEARit Smart Video Doorbell Camera, highlighting its key features such as 2K QHD video, human body detection, two-way audio, and secure local storage.

## SETUP GUIDE

---

### Package Contents

# Everything You Need

Control your baby monitor with the **AuraHome Control** App

GET IT ON  
Google Play

Download on the  
App Store

Before you begin, ensure all components are present in the package:

- GEARit Smart Video Doorbell Camera
- USB Type-C Cable
- Screwdriver
- Mounting Bracket
- User Manual (this document)
- Screw Pack
- Wiring Pack (for optional wired installation)
- Adhesive Tape (for optional adhesive mounting)

## Installation Steps

1. **Charge the Battery:** Fully charge the doorbell camera using the provided USB Type-C cable before initial use. A full charge ensures optimal performance and battery life.
2. **Download the App:** Download the "AuraHome Control App" from the App Store (iOS) or Google Play Store

(Android). This app is essential for controlling and managing your doorbell camera.

### 3. **Mount the Doorbell:**

- **Screw Mounting:** Use the mounting bracket and screw pack to securely attach the doorbell to your desired location on the door frame or wall.
- **Adhesive Mounting:** For a drill-free option, use the included adhesive tape to attach the mounting bracket. Ensure the surface is clean and dry for strong adhesion.

4. **Connect to App:** Follow the in-app instructions to connect your doorbell camera to your home Wi-Fi network and pair it with your smartphone. This typically involves scanning a QR code displayed on your phone with the doorbell camera.
5. **Customize Settings:** Once connected, customize settings such as motion detection sensitivity, notification preferences, and video recording options within the AuraHome app.

## OPERATING INSTRUCTIONS

---

### Live View and Two-Way Audio

Open the AuraHome app on your smartphone to access the live video feed from your doorbell camera. From the live view, you can initiate two-way audio by tapping the microphone icon to speak with visitors, and hear their responses through the doorbell's speaker.

### Motion Detection and Alerts

The doorbell camera is equipped with motion and sound detection. When activity is detected, you will receive an instant push notification on your smartphone. Tap the notification to view the live feed or review recorded events. You can adjust the sensitivity of motion detection in the app settings to minimize false alerts.

### Video Recording and Storage

The camera records video clips when motion or sound is detected. These clips are stored on a microSD card (if installed) or can be accessed via optional cloud storage services (subscription may be required).

To install a microSD card, locate the card slot on the back of the doorbell camera, typically under a protective cover. Insert the card gently until it clicks into place. Ensure the doorbell is powered off before inserting or removing the card.

### Night Vision

The doorbell camera automatically switches to night vision mode in low-light conditions, providing clear black-and-white video. No manual adjustment is required for this feature.

## MAINTENANCE

---

### Battery Charging

The doorbell camera features a rechargeable battery designed for long-term use. When the battery level is low, you will receive a notification via the AuraHome app. To recharge, simply remove the doorbell unit from its mounting bracket and connect it to a power source using the provided USB Type-C cable.

A full charge can last up to 6 months, depending on usage frequency and environmental factors.

### Cleaning

To maintain optimal performance and clear video quality, periodically clean the camera lens and the doorbell's exterior. Use a soft, damp cloth to gently wipe away dust and dirt. Avoid using harsh chemicals or abrasive materials that could damage the device.

## MicroSD Card Management

If you are using a microSD card for local storage, it is recommended to periodically review and manage your recorded footage. You can format the microSD card through the AuraHome app to clear old recordings and free up space. Ensure important footage is backed up before formatting.

## TROUBLESHOOTING

| Problem                              | Possible Cause  | Solution   |
|--------------------------------------|---|--|
| Doorbell not connecting to Wi-Fi.    | Incorrect Wi-Fi password, weak signal, or incompatible network (e.g., 5GHz only). | Double-check Wi-Fi password.<br>Ensure the doorbell is within range of your 2.4GHz Wi-Fi network.<br>Restart your router and the doorbell camera.  |
| No motion detection alerts.          | Motion detection disabled, sensitivity too low, or app notifications blocked.     | Enable motion detection in the AuraHome app.<br>Increase motion detection sensitivity.<br>Check your phone's notification settings for the AuraHome app.   |
| Poor video quality or blurry images. | Dirty lens, poor Wi-Fi signal, or insufficient lighting.                          | Clean the camera lens with a soft cloth.<br>Ensure strong Wi-Fi signal at the doorbell's location.<br>Verify night vision is activating in low light.  |
| Two-way audio delay or distortion.   | Network latency, weak Wi-Fi signal, or app issue.                                 | Ensure a stable and strong Wi-Fi connection.<br>Close and reopen the AuraHome app.<br>Check for app updates.   |
| Battery drains quickly.              | Frequent motion detection, high live view usage, or extreme temperatures.         | Reduce motion detection sensitivity if receiving too many alerts.<br>Limit frequent live view access.<br>Ensure the doorbell is not exposed to extreme hot or cold temperatures for prolonged periods. |
