4. INSTALLATION GUIDE

Professional installation is recommended for this car stereo system. Incorrect installation can lead to damage to the unit or your vehicle. Ensure the vehicle's power is disconnected before beginning installation.

4.1 Vehicle Compatibility

This product is designed for Hyundai Santa Fe IX45 models from 2013-2018. Please verify your car's central control panel matches the compatible design (Option A) before installation.

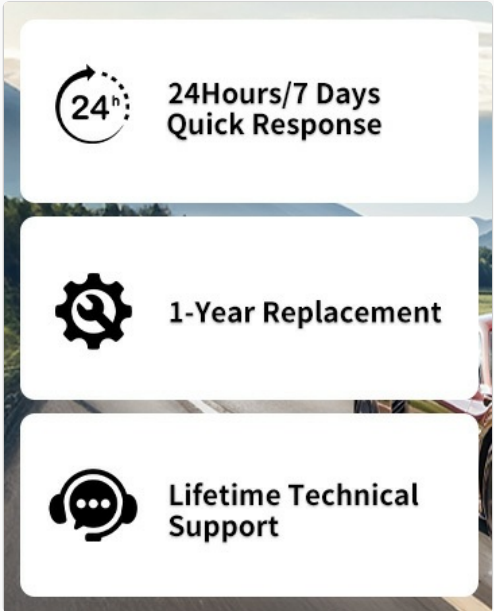

Image 4.1: Ensure your vehicle's dashboard matches Option A for compatibility.

4.2 Wiring Diagram

Refer to the following diagram for connecting the camera and other components. Ensure all connections are secure and correctly matched.

Image 4.2: General wiring diagram for camera and power connections.

Important: The reverse control wire on the power cord (marked as "Reverse" or "Back") should be connected to the positive pole of your car's reversing light. The black wire should be connected to GND (ground).

5. OPERATING INSTRUCTIONS

5.1 Initial Power On & Basic Navigation

After installation, turn on your vehicle's ignition. The stereo should power on automatically. The touchscreen interface allows for intuitive control. Use the side buttons for quick access to common functions like power, home, volume, and navigation.

5.2 WiFi Connection

To access online features and download applications, connect the stereo to a WiFi network.

1. Go to **Settings** on the main menu.
2. Select **Network & Internet** or **WiFi**.
3. Turn on WiFi and select your desired network.
4. Enter the password if prompted.

CAR MODELS Attention

Before purchasing, please select the product based on your original car's central control panel. This product only supports Option A. If you require Option B, please contact our customer service for suitable recommendations.

The Correct Model

Wrong Vehicle Model

Image 5.1: WiFi connection enables access to online apps and services.

5.3 Bluetooth Pairing

Pair your smartphone via Bluetooth for hands-free calls and music streaming.

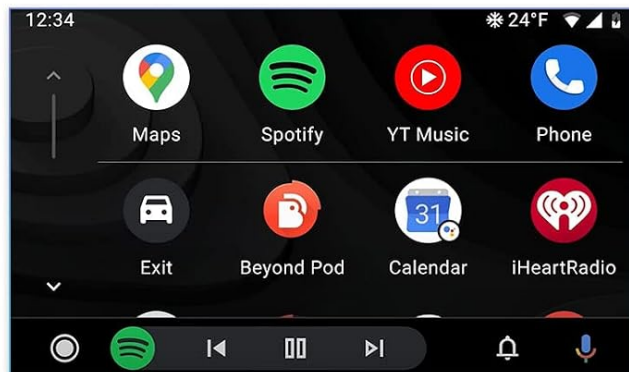

1. Enable Bluetooth on your smartphone.
2. On the car stereo, go to **Settings** and select **Bluetooth**.
3. Search for available devices and select your phone.
4. Confirm the pairing code on both devices.

5.4 Carplay & Android Auto

Synchronize your smartphone's apps, navigation, and music to the stereo.

Apple Carplay & Android Auto

The radio can synchronize mobile phone text messages, make calls, mobile phone navigation software, online music software, etc. Support calling the mobile phone voice assistant to realize the voice control of this function on the radio.

Wireless Carplay

USB and WiFi connection

Android Auto

USB and WiFi connection

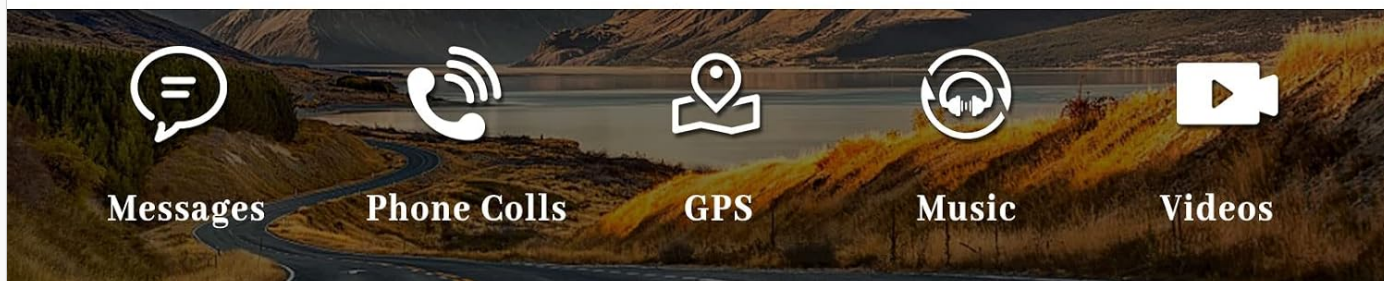

Image 5.2: Apple Carplay and Android Auto interfaces.

- Ensure your phone's WiFi is on.
- Connect your phone via Bluetooth.
- Open the **ZLINK5** application on the stereo to automatically connect.
- Alternatively, use a USB cable to connect your phone and then open the **ZLINK5** app.

5.5 Mirror Link

Project your mobile phone screen onto the car stereo display.

- To ensure optimal clarity, check the camera resolution in **Factory Settings**. Set it to **AHD 720/25fps**. The factory setting password is **000000**.

6. MAINTENANCE

To ensure the longevity and optimal performance of your car stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents.
- **Temperature:** Avoid exposing the unit to extreme temperatures for extended periods.
- **Software Updates:** Periodically check for software updates to ensure the system runs efficiently and has the latest features.

7. TROUBLESHOOTING

If you encounter issues with your SIXTOP Android Car Stereo, refer to the following common problems and solutions:

Problem	Possible Solution
Unit does not power on	Check power cable connections and vehicle's fuse box. Ensure proper installation.
No sound	Verify speaker connections. Check volume levels and mute settings. Ensure audio output mode is correct.

Problem	Possible Solution
Steering wheel controls not working	Ensure the steering wheel control wires are correctly connected. Re-perform the 'Steering Learn' process in settings. If issues persist, consult a professional installer.
GPS signal lost or inaccurate	Ensure the GPS antenna is properly installed and has a clear view of the sky. Check GPS settings.
Bluetooth connection issues	Ensure Bluetooth is enabled on both devices. Delete previous pairings and re-pair. Restart both devices.
Touchscreen unresponsive	Restart the unit. If the problem persists, contact customer support.
