SETUP GUIDE

Upon receiving your Cozyplayer pillow, follow these steps for initial setup:

1. **Unpack:** Carefully remove the pillow from its vacuum-sealed packaging.
2. **Allow Expansion:** The memory foam core will begin to expand immediately. Allow several hours (up to 24-48 hours)

for the pillow to fully regain its intended shape and firmness.

3. **Airing Out:** A slight foam odor may be present upon unpacking. This is normal and harmless. Place the pillow in a well-ventilated area for a day or two to dissipate any initial scent.
4. **Optional Pillowcase:** While the pillow comes with a soft, cooling cover, you may place your own standard queen-size pillowcase over it if desired.

OPERATING INSTRUCTIONS

The Cozyplayer pillow is designed to support various sleep positions. Experiment to find the configuration that best suits your comfort and support needs.

- **Back Sleepers:** Position your head in the central hollow area. The contoured design will support the natural curve of your neck, maintaining proper spinal alignment.
- **Side Sleepers:** Utilize the raised side areas of the pillow. The hollow ear zone (the small button-like indentation) is specifically designed to prevent pressure on your ear, ensuring comfort throughout the night. The extended armrest areas allow you to comfortably position your arms without cutting off circulation.
- **Stomach Sleepers:** The pillow's design also accommodates stomach sleepers, providing a comfortable surface and allowing for natural arm placement.
- **Adjustable Arch:** The pillow offers two different heights/arches. You can rotate the pillow 180 degrees to choose between a higher or lower neck support, depending on your preference for more or less cervical arch.

MAINTENANCE AND CARE

Proper care will extend the life and performance of your Cozyplayer pillow:

- **Pillowcase Cleaning:** The outer pillowcase is removable and washable. Locate the zipper on the side of the pillow to remove the cover. Machine wash the cover with like colors on a gentle cycle with cold water. Tumble dry on low heat or air dry.
- **Memory Foam Core:** **DO NOT WASH THE MEMORY FOAM CORE.** Washing the memory foam will damage its structure and properties. If the foam core becomes soiled, spot clean gently with a damp cloth and mild detergent, then allow it to air dry completely away from direct sunlight.
- **Air Circulation:** Periodically air out the pillow (without the cover) in a well-ventilated area to maintain freshness.

TROUBLESHOOTING

Here are solutions to common concerns you might encounter:

Issue	Possible Cause	Solution
-------	----------------	----------

Issue	Possible Cause	Solution
Initial Odor	New memory foam may have a slight, temporary odor from manufacturing.	Allow the pillow to air out in a well-ventilated room for 24-48 hours before first use. The odor will dissipate naturally.
Discomfort during initial use	Your body may need time to adjust to the new ergonomic shape and support.	Give yourself a few nights to adapt. Experiment with different pillow orientations (higher or lower arch) and sleep positions to find what feels best.
Ear discomfort (for side sleepers)	Ear may be resting on a firm part of the pillow.	Ensure your ear is positioned within the central hollow ear zone designed to relieve pressure. Adjust your head slightly until comfortable.
Pillow feels too hot	While designed for cooling, external factors or individual body temperature can affect perception.	Ensure the cooling side of the pillowcase is facing up. Consider room temperature and bedding materials. The breathable memory foam helps, but extreme conditions may still cause warmth.
