IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of fire, electric shock, injury to persons, or damage to the appliance, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before using the appliance.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against electric shock, do not immerse cord, plugs, or the appliance in water or other liquid.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Contact V-Guard customer service for examination, repair, or adjustment.
- The appliance is equipped with **overheat protection** and **up to 5 kV surge protection**. The induction will automatically shut off to prevent overheating and damage.

- Utilizes **Smart Pan Sensor Technology**, heating only when suitable cookware is placed on it, ensuring safety and energy efficiency.
- Use only induction-compatible cookware.
- Ensure adequate ventilation around the cooktop during operation.

WHAT'S IN THE BOX

Upon unpacking, please ensure all items are present and in good condition:

- 1 x V-Guard VIC 2.0 BRE Induction Cooktop
- 1 x User Manual cum Warranty Card

PRODUCT OVERVIEW

The V-Guard VIC 2.0 BRE Induction Cooktop is designed for efficient and convenient cooking with its advanced features:

- **2000 W High Power:** Provides fast and energy-efficient cooking with direct bottom heat.
- **Super Slim Design:** At just 41 mm thick, it offers a sleek and modern aesthetic.
- **Digital Display:** User-friendly interface to monitor cooking progress.
- **10 Power and Temperature Modes:** Offers versatile cooking options (300W-2000W, 60°C-240°C) tailored for various cuisines.
- **Touch Panel Control:** For convenient and effortless operation.
- **Smart Pan Sensor Technology:** Ensures safety and energy saving by heating only when a pan is present.
- **Utmost Safety:** Features overheat protection and 5 kV surge protection for peace of mind.

SETUP

Follow these steps to set up your induction cooktop:

1. **Unpack:** Carefully remove the induction cooktop from its packaging. Retain packaging for future transport or storage.
2. **Placement:** Place the cooktop on a flat, stable, and heat-resistant surface. Ensure there is sufficient space around the appliance for proper ventilation (at least 10-15 cm from walls or other objects).
3. **Power Connection:** Plug the 16A power cord into a grounded 16A electrical outlet. Ensure the voltage matches the specifications of the appliance.
4. **Initial Cleaning:** Wipe the glass surface with a soft, damp cloth before first use.

Aerodynamic Cooling System

Fast Cooling for Longer Product Life and Safety

OPERATING INSTRUCTIONS

General Operation

1. **Power On:** Press the **ON/OFF** button to turn on the cooktop. The digital display will light up.
2. **Place Cookware:** Place suitable induction-compatible cookware centrally on the cooking zone. The cooktop will only activate when a pan is detected.
3. **Select Mode:** Choose your desired cooking mode or adjust power/temperature settings using the touch panel controls.
4. **Adjust Settings:** Use the **+** and **-** buttons to increase or decrease power/temperature.
5. **Timer Function:** Press the **Timer** button to set a cooking duration.
6. **Power Off:** After cooking, press the **ON/OFF** button to turn off the appliance. The fan may continue to run for a short period to cool down internal components.

Power and Temperature Modes

The cooktop offers 10 power and temperature modes for precise cooking control:

Unleash Ultimate Power with 2000 W for Instant Cooking

Different Power Levels
(300 W - 2000 W)

Fast and Efficient Cooking

Overheat Protection

Power Level (Watts)	Temperature (Celsius)
300W	60°C
600W	90°C
900W	120°C
1200W	150°C
1400W	180°C
1600W	200°C
1800W	220°C
2000W	240°C

Cooking Modes

The V-Guard VIC 2.0 BRE features 7 versatile cooking modes, optimized for various dishes:

- **Manual:** For custom power and temperature settings.
- **Fry:** Ideal for frying and sautéing.
- **Boil:** For boiling water or other liquids.
- **Idli:** Pre-set mode for preparing Idli.
- **Slow Cook:** For dishes requiring longer cooking times at lower temperatures.
- **Dosa/Chapati:** Optimized for making Dosa and Chapati.
- **Milk:** Gentle heating for milk to prevent boiling over.

CARE AND MAINTENANCE

Proper care ensures the longevity and optimal performance of your induction cooktop:

- **Cleaning the Glass Surface:**
 - Always ensure the cooktop is unplugged and completely cool before cleaning.
 - Wipe the glass surface with a soft, damp cloth and mild detergent.
 - For stubborn stains, use a non-abrasive cleaner specifically designed for ceramic or induction cooktops.
 - Do not use abrasive pads, harsh chemicals, or steel wool, as these can scratch or damage the surface.
 - Dry thoroughly with a clean, soft cloth.
- **Cleaning the Body:** Wipe the exterior body with a soft, damp cloth. Do not allow water to enter the internal components.
- **Ventilation Openings:** Keep the ventilation openings clear of dust and debris to ensure efficient cooling.

TROUBLESHOOTING

If you encounter issues with your induction cooktop, refer to the table below for common problems and solutions:

Problem	Possible Cause	Solution
Cooktop does not turn on.	No power supply; appliance not plugged in; power button not pressed.	Check power cord connection; ensure outlet is functional; press ON/OFF button.
Cooktop turns on but does not heat.	Incorrect cookware used; cookware not centered; pan sensor not detecting.	Use induction-compatible cookware; center the cookware on the cooking zone; ensure cookware has a flat bottom.
Display shows an error code (e.g., E0, E1).	Overheating; voltage fluctuation; internal malfunction.	Turn off and unplug the cooktop, let it cool down; check power supply stability; if error persists, contact customer service.
Unusual noise during operation.	Normal fan operation; resonance from cookware.	A slight humming sound from the cooling fan is normal. Some cookware may produce a faint buzzing sound due to induction principles.

If the problem persists after attempting these solutions, please contact V-Guard customer support.

TECHNICAL SPECIFICATIONS

Feature	Specification
Brand	V-Guard
