› Lamshaw TPU Screen Protector for Fanvace P6 MP3 Player - Instruction Manual

Lamshaw P6

Lamshaw TPU Screen Protector for Fanvace P6 MP3 Player

Instruction Manual

INTRODUCTION

This manual provides instructions for the Lamshaw TPU Screen Protector designed for the Fanvace P6 5-inch MP3 Player. This screen protector offers full coverage, anti-shatter, and anti-scratch properties, ensuring the display of your device remains protected and clear. Please ensure your device model is the Fanvace P6 5-inch MP3 Player for proper fit.

SETUP AND INSTALLATION

Before installation, ensure your device screen is clean and free of dust. The screen protector consists of three layers. Identify the 'Back 1' (red tab) and 'Front 2' (black tab) layers.

What's in the Box:

- 6 x Screen Protectors
- 1 x Squeegee
- 1 x Microfiber Cloth
- 3 x Alcohol Cleaning Wipes

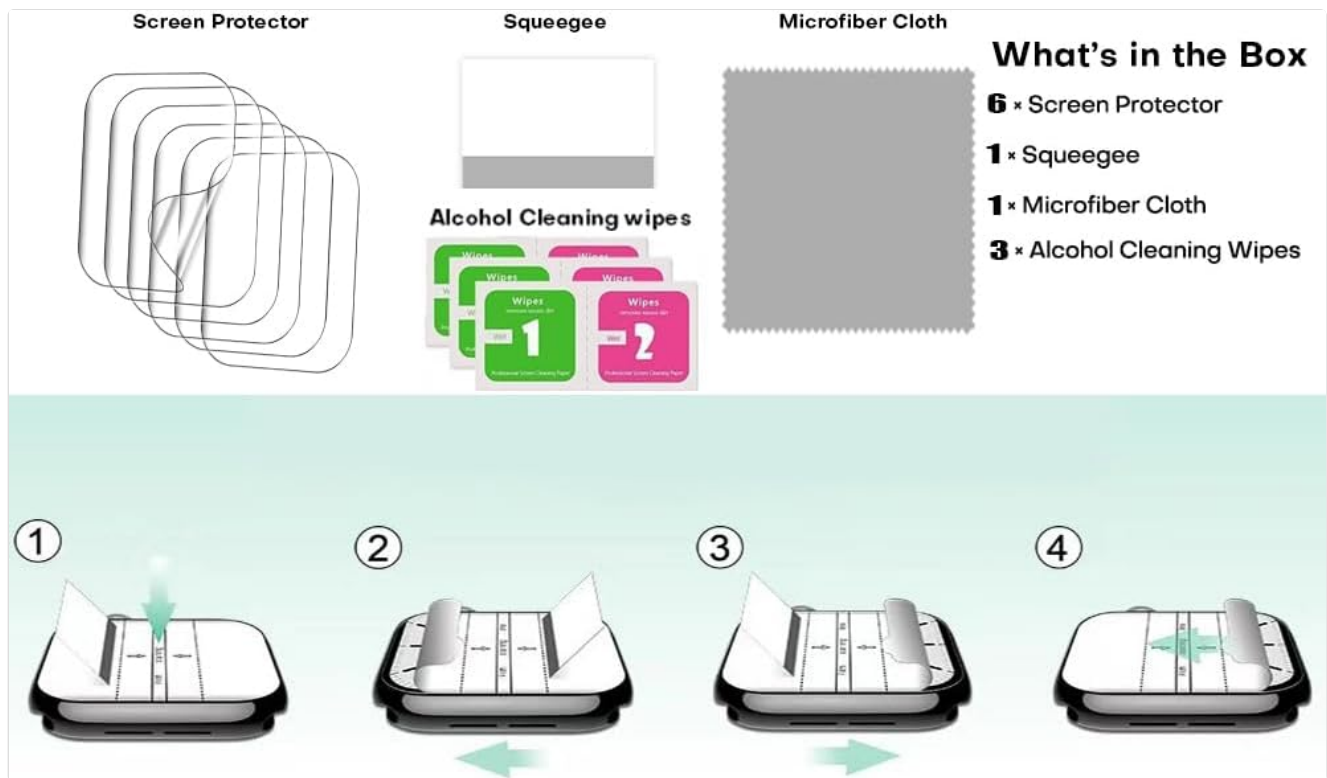

Image: Contents of the package and a visual guide for installation steps.

Installation Steps:

1. **Clean the Screen:** Use the provided alcohol wipe (Wipes 1) to thoroughly clean the device screen. Follow with the dry wipe (Wipes 2) and then the microfiber cloth to remove any dust or smudges.
2. **Peel Back Layer:** Carefully peel off the red 'Back 1' layer from the screen protector.
3. **Apply Protector:** Align the screen protector precisely with your device's screen. Gently apply it, ensuring proper placement.
4. **Smooth Bubbles:** Use the provided squeegee or a similar flat card to smooth out any air bubbles, working from the center outwards.
5. **Remove Top Layer:** Once the protector is applied smoothly, peel off the black 'Front 2' layer.
6. **Final Smoothing:** If any small bubbles remain, they should self-heal within 24 hours. For large bubbles, carefully lift the nearest edge of the protector and re-apply, smoothing it down with the squeegee.

OPERATING INSTRUCTIONS

The Lamshaw TPU Screen Protector is designed to be virtually invisible and maintain the full functionality of your Fanvace P6 MP3 Player's display.

Original Touch Response:

The protector ensures that your device's screen responds quickly and accurately to touch inputs, without any noticeable lag or reduction in sensitivity. You can interact with your MP3 player as if no protector is present.

Original Touch Response

Responds quickly without any lag or mistake

Image: A hand interacting with a device screen, illustrating the maintained original touch response with the protector applied.

High Transparency:

The clear film ensures high transparency, preserving the original brightness and color vibrancy of your MP3 player's display for an optimal viewing experience.

MAINTENANCE

Automatic Repair (Self-Healing):

The screen protector features advanced self-healing technology. Minor scratches and small air bubbles that may appear after installation or during use will automatically disappear within 24 hours, keeping your screen looking new.

Automatic Repair

The self-healing technology constantly eliminates minor scratches and bubbles within 24hrs.

Special Oleophobic Coating:

An oleophobic coating is applied to the screen protector to resist fingerprints, smudges, and oil residue. This helps keep your screen clean and clear. To clean the screen, gently wipe it with the provided microfiber cloth or another soft, lint-free cloth.

Special Oleophobic Coating

Keep clean and clear against smudges and oil residue

Image: Water droplets on a screen, demonstrating the oleophobic coating's ability to repel liquids and oils.

TROUBLESHOOTING

- **Bubbles after installation:** Small bubbles typically disappear within 24 hours due to the self-healing properties of the TPU film. For larger bubbles, gently lift the edge of the screen protector closest to the bubble and re-apply, using the squeegee to push the air out towards the edge.
- **Difficulty with layer separation:** The screen protector has three layers. If the middle protective layer separates incorrectly (e.g., sticks to the 'Back 1' red tab instead of the main protector), gently wrinkle the 'Back 1' (red) tab to help re-align the middle layer with the 'Front 2' (black) tab before attempting to apply the protector to the screen.

SPECIFICATIONS

Feature	Detail
Material	TPU (Thermoplastic Polyurethane) Film

Item Hardness	2H
Compatible Device	Fanvace P6 5-inch MP3 Player
Special Features	Anti-Shatter, Anti-Scratch, High Transparency, High Sensitivity, Bubble Self-Healing, Oleophobic Coating
Package Quantity	6 Pack
