6. OPERATING INSTRUCTIONS

6.1. Using the Storage Drawers

The two integrated drawers are designed for convenient storage. Simply pull the drawers out from under the bed to access their contents. Push them back in until they are flush with the bed frame for a neat appearance. Avoid overloading the drawers to ensure smooth operation and prevent damage.

6.2. Using the USB Charging Station

The daybed includes a built-in charging station with USB ports and power outlets. To use, ensure the bed is properly assembled and the power cord from the charging station is plugged into a functional wall outlet. You can then connect your electronic devices to the USB ports or power outlets for charging.

7. MAINTENANCE

Proper maintenance will extend the life and appearance of your daybed:

- **Cleaning:** Wipe the wooden surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, which can damage the finish.
- **Fastener Checks:** Periodically (e.g., every 3-6 months) check all screws, bolts, and connections to ensure they are tight. Re-tighten as necessary to maintain stability.
- **Drawer Care:** Keep the drawer tracks clean and free of debris to ensure smooth operation.
- **USB Port Care:** Ensure the USB ports and outlets are free from dust and debris. Do not force plugs into the ports.

8. TROUBLESHOOTING

If you encounter any issues with your daybed, consider the following common solutions:

- **Bed Feels Unstable/Wobbly:** Check all assembly fasteners. Ensure they are fully tightened. Verify that all parts are correctly aligned according to the assembly instructions.
- **Drawers Stick/Don't Slide Smoothly:** Inspect the drawer tracks for any obstructions or debris. Ensure the drawers were assembled correctly and are aligned within their runners.
- **USB Charging Station Not Working:** Confirm the power cord is securely plugged into both the charging station and a functional wall outlet. Test the outlet with another device.
- **Squeaking Noises:** Tighten all bed frame bolts and screws. Ensure the mattress is properly seated on the slats.
