### SETUP

#### 1. Initial Charging

Before first use, fully charge your smartwatch. Connect the magnetic charging cable to the charging contacts on the back of the watch and plug the USB end into a standard USB power adapter (not included) or a computer's USB port. The watch display will indicate charging status.

#### 2. App Installation & Pairing

To unlock the full potential of your smartwatch, download the companion application on your smartphone. The app is compatible with both iPhone and Android devices. Refer to the quick start guide included in the box for the specific app name and QR code for easy download.

1. Scan the QR code in the quick start guide or search for the app name in your phone's app store.
2. Install the application on your smartphone.
3. Open the app and follow the on-screen instructions to create an account and set up your profile.
4. Enable Bluetooth on your smartphone.
5. Within the app, navigate to the device pairing section and select your smartwatch from the list of

available devices.

6. Confirm the pairing request on both your phone and the smartwatch.

### 3. Language Selection

You can set the language on your smartwatch directly through its settings menu. Navigate to the settings icon, then look for a language option (often represented by a globe icon or text like 'Language'). Select your preferred language from the list.

Video: This video demonstrates the user interface of the Outfany Trackpro 2.0 Smartwatch, including how to navigate through various functions and change language settings. It provides a visual guide for initial setup and feature exploration.

## OPERATING INSTRUCTIONS

---

### Basic Navigation

The smartwatch features a full-touch screen for intuitive navigation. Swipe left, right, up, or down to access different menus and functions. Tap an icon to select it, and typically swipe right or press the side button to go back to the previous screen.

### Accessing Features

From the main watch face, swipe to access various features:

- **Workouts/Sports Modes:** Select from over 50 sports modes to track your activity, including outdoor walk, hiking, indoor run, mountaineering, sailboat, push-ups, and football.
- **Pedometer:** Monitors your daily steps, distance, and calories burned.
- **Sleep Monitoring:** Tracks your sleep patterns, including deep sleep duration.
- **Heart Rate:** Measures your heart rate in beats per minute (bpm).
- **Blood Pressure:** Provides an estimate of your blood pressure.
- **Blood Oxygen:** Measures your blood oxygen saturation.
- **Blood Glucose:** Offers an estimated blood glucose level. *Note: This feature is for reference only and should not be used for medical diagnosis or treatment.*
- **Notifications:** View incoming calls, messages, and alerts from connected apps.
- **Call Functionality:** Answer and dial calls directly from the watch with high-definition voice quality.
- **Voice Assistant:** Utilize the integrated voice assistant for hands-free operations.
- **Music Playback:** Control music playing on your connected smartphone.
- **Weather Forecasts:** Get real-time weather updates.
- **Find Phone:** Locate your misplaced smartphone by triggering an alert sound.
- **Remote Camera Control:** Use your watch as a remote shutter for your phone's camera.
- **Calculator:** A basic calculator for quick computations.
- **Alarm/Timer:** Set alarms and use the timer function.

## MAINTENANCE

---

### Cleaning Your Smartwatch

To maintain the appearance and functionality of your smartwatch, regularly clean it with a soft, dry, lint-free cloth. For stubborn dirt, slightly dampen the cloth with water. Avoid using harsh chemicals, abrasive cleaners, or solvents as they may damage the device.

## Water Resistance (IP67)

Your smartwatch has an IP67 waterproof rating, meaning it is resistant to dust and can withstand immersion in water up to 1 meter for up to 30 minutes. It is suitable for daily use, such as washing hands or light rain. **It is not recommended for swimming, showering with hot water, or diving, as prolonged exposure to water or high-pressure water jets may compromise the seal and affect performance.**

## Charging Best Practices

Always use the provided magnetic charging cable. Ensure the charging contacts on the watch and cable are clean and dry before charging. Avoid overcharging the device; once fully charged, disconnect it from the power source. Store the watch in a cool, dry place when not in use.

## Care and Replacement of Watch Bands

Inspect your watch band regularly for signs of wear and tear. If the band becomes damaged or uncomfortable, consider replacing it. The Fit senso Trackpro / Outfany Trackpro 2.0 Smartwatch uses a standard pin watch band, allowing for easy replacement with compatible bands.

## TROUBLESHOOTING

If you encounter issues with your smartwatch, please refer to the following common problems and solutions:

| Problem   | Possible Solution  |
|---|--|
| <b>Watch not turning on or short battery life</b> | Ensure the watch is fully charged using the magnetic charging cable. Check if the charging contacts are clean. If battery life is consistently short, try reducing screen brightness or disabling unnecessary notifications.                                   |
| <b>Difficulty pairing with smartphone</b>         | Make sure Bluetooth is enabled on your phone and the smartwatch is within range. Restart both the watch and your phone. Ensure the companion app is updated to the latest version. Forget the device in your phone's Bluetooth settings and try pairing again. |
| <b>Health monitoring readings are inaccurate</b>  | Ensure the watch is worn snugly on your wrist, not too tight or too loose. Clean the sensor on the back of the watch. Note that health monitoring features are for general wellness and fitness purposes and are not intended for medical use.                 |
| <b>Notifications not appearing</b>                | Check notification settings in the companion app and on your smartphone. Ensure the app has necessary permissions to access notifications. Verify that the watch is properly connected via Bluetooth.  |
| <b>Screen is unresponsive</b>                     | Try restarting the smartwatch. If the issue persists, ensure the screen is clean and dry.  |

## SPECIFICATIONS
