

AnEgoe ZX001

AnEgoe ZX001 Air Purifier Replacement H13 True HEPA Filters Instruction Manual

INTRODUCTION

This instruction manual provides essential information for the proper installation and maintenance of your AnEgoe ZX001 Air Purifier Replacement H13 True HEPA Filters. These filters are specifically designed to ensure optimal performance and compatibility with the AnEgoe ZX001 air purifier. Using official replacement filters is crucial for maintaining the efficiency and longevity of your air purification system.

PRODUCT FEATURES

The AnEgoe ZX001 replacement filters feature a comprehensive 3-stage filtration system designed to capture a wide range of airborne particles and odors:

- **Washable Pre-filter:** Captures larger particles such as dust, pet hair, and lint. This pre-filter is removable and washable, contributing to cost savings and extending the life of subsequent filter stages.
- **H13 True HEPA Filter:** Traps at least 99.97% of airborne particles as small as 0.3 microns, including pollen, dust mites, pet dander, and smoke particles.
- **High-Activated Carbon Filter:** Effectively absorbs various household odors, smoke, and volatile organic compounds (VOCs), ensuring fresher air.

INSTALLATION AND FILTER REPLACEMENT

It is recommended to replace the filters every 6 months for optimal performance. Your AnEgoe ZX001 air purifier features a filter replacement reminder function that will indicate when a replacement is due.

Steps for Filter Replacement:

1. **Power Off:** Ensure the air purifier is turned off and unplugged from the power outlet before proceeding.
2. **Access Filters:** Open the filter compartment of your AnEgoe ZX001 air purifier. Refer to your air purifier's main manual for specific instructions on how to open the compartment.
3. **Remove Old Filters:** Carefully remove the used filters from the air purifier. Dispose of them according to local regulations.
4. **Install New Filters:** Unpack the new AnEgoe ZX001 replacement filters. Insert the new filters into the air purifier, ensuring they are correctly oriented and seated firmly in place. The filters are double-sided, designed for efficient air intake.
5. **Close Compartment:** Securely close the filter compartment.
6. **Reset Filter Life Indicator:** Plug in and power on the air purifier. Locate the filter reset button or function on your air purifier's control panel. Press and hold it for approximately 3-5 seconds until the filter replacement indicator resets. This confirms the new filters are recognized and the filter life timer has restarted.

MAINTENANCE

Regular maintenance ensures the continued efficiency of your air purifier and filters.

- **Pre-filter Cleaning:** The washable pre-filter can be cleaned periodically to remove accumulated large particles. Gently remove the pre-filter and rinse it under running water or vacuum it. Ensure it is completely dry before re-installing.
- **Filter Replacement Schedule:** Adhere to the recommended 6-month replacement schedule for the H13 True HEPA and Activated Carbon filters. The air purifier's filter reminder will assist you in tracking this.
- **Avoid Water:** Do not wash the H13 True HEPA or Activated Carbon filters with water, as this can damage their filtration capabilities.

TROUBLESHOOTING

If you experience issues after replacing your filters, consider the following:

- **Air Quality Not Improving:** Ensure the new filters are correctly installed and the filter compartment is securely closed. Verify that the air purifier is operating on an appropriate fan speed.
- **Filter Indicator Still On:** Confirm that you have properly reset the filter life indicator after installing the new filters. Refer to the 'Installation and Filter Replacement' section for instructions.
- **Unusual Noise:** Check that the filters are seated correctly and not obstructing any internal components. Ensure no foreign objects are inside the air purifier.

SPECIFICATIONS

Model Number	ZX001 (for compatible air purifier)
Filter Type	3-Stage Filtration (Pre-filter, H13 True HEPA, Activated Carbon)
Dimensions (per filter)	Approximately 1"D x 9.25"W x 10.83"H

Weight (per filter)	Approximately 0.42 Kilograms (14.89 ounces)
Recommended Replacement	Every 6 months
