6. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your air conditioner.

6.1 Filter Cleaning

The removable, washable filter should be cleaned regularly (every two weeks or as needed) to maintain air quality and unit efficiency.

1. Turn off and unplug the unit.
2. Remove the air filter from its housing.
3. Wash the filter under running water or use a vacuum cleaner to remove dust.
4. Allow the filter to air dry completely before reinserting it into the unit.

6.2 Self-Evaporation System

This unit features a self-evaporation system that automatically evaporates and expels condensation. In extremely humid conditions, some water may accumulate. If the unit stops operating and displays an 'E5' error code, it indicates the water tank is full and needs to be drained. Refer to the troubleshooting section for draining instructions.

6.3 Storage

Before storing the unit for an extended period:

- Drain any accumulated water completely.
- Clean the air filter.
- Unplug the power cord and coil it neatly.
- Store the unit in a cool, dry place, away from direct sunlight and extreme temperatures.

7. TROUBLESHOOTING

If you experience issues with your unit, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
Unit does not turn on.	No power, tripped circuit breaker, or power cord not fully plugged in.	Check power outlet, circuit breaker, and ensure the power cord is securely plugged in.
Unit is not cooling effectively.	Dirty air filter, blocked air intake/outlet, room size too large, or windows/doors open.	Clean the air filter. Ensure no obstructions. Close all windows and doors. Verify room size is within 150 sq. ft.
Unit is noisy.	Unit not on a flat surface, or normal operating sounds.	Ensure the unit is on a level surface. Some operational noise is normal.
Error Code 'E5' displayed.	Water tank is full.	Turn off the unit, unplug it, and drain the accumulated water from the drain port at the bottom. Restart the unit.
