3.2 Important Voltage Information

WARNING: This product is a travel adapter, not a voltage converter.

It is crucial to verify that your electronic devices (e.g., hair dryers, straighteners, curling irons) are dual voltage (100V-250V) before plugging them into this adapter. Using a single-voltage device in a country with a different voltage can cause damage to the device and the adapter, and may pose a safety risk.

Wide Compatibility

Please make sure devices to support 100V-250V wide voltage
