7. TROUBLESHOOTING

If you encounter any issues with your Hzueneri Blanket Ladder Shelf, please refer to the following common solutions:

Problem	Possible Cause	Solution
Ladder feels unstable or wobbly.	Loose screws or uneven placement.	Ensure all assembly screws are fully tightened. Verify the ladder is placed on a flat, level surface. Utilize the anti-tipping straps to secure it to the wall.
Missing parts during unboxing.	Packaging error or lost during transit.	Carefully check all packaging materials. If parts are still missing, contact Hzueneri customer support with your purchase details.
Difficulty unfolding side columns.	Hinges may be stiff.	Apply gentle, even pressure. If hinges are excessively stiff, a small amount of lubricant can be applied, but ensure it does not stain the wood.
Scratches on wall/floor.	Felt pads are missing or damaged.	Ensure the anti-slip felt pads are properly attached to the bottom of the legs and the beveled top. Replace if damaged.
