7. TROUBLESHOOTING

If you encounter any issues with your buffet sideboard, refer to the following common solutions:

Problem	Possible Cause	Solution
Cabinet feels wobbly or unstable.	Loose fasteners; uneven floor; not secured to wall.	Tighten all screws and bolts. Ensure the cabinet is on a level surface. Install or re-check the wall anchor.
Drawers do not slide smoothly or are misaligned.	Incorrect drawer installation; debris in tracks; loose drawer slides.	Verify drawers are in their correct positions (they are not all the same). Clean drawer tracks. Tighten screws on drawer slides.
Doors are misaligned or do not close properly.	Loose hinges; cabinet not level.	Adjust hinges as per assembly instructions. Ensure the cabinet is level.
Laminate flaking or damage during assembly.	Over-tightening screws; manufacturing defect.	Avoid over-tightening screws. If damage is significant or due to defect, contact customer support.
