This image displays the AiBaoQi HAMTOD H3 phone from a slightly angled perspective, showcasing its 2.8-inch screen, physical keypad, and rugged design. The back panel with textured grip is also visible.

Key Features:

- **4G Connectivity:** Supports 4G VoLTE for clear calls and reliable network performance.
- **Rugged Design:** IP68 certified for water and dust resistance, and 1.5M drop-proof.
- **2.8-inch HD Screen:** Clear display with 320x240 resolution.
- **Long-lasting Battery:** 2000mAh Li-ion battery for extended use.
- **SOS Button:** Dedicated button for emergency contacts.
- **Powerful Flashlight:** Independent flashlight for illumination.
- **Multimedia:** Music player, video player, video recorder, FM radio.
- **Dual SIM Support:** Allows for two SIM cards simultaneously.

Figure 2: HAMTOD H3 Key Features Overview

This image highlights several key features of the HAMTOD H3 phone, including its IP68 ruggedness, 4G VoLTE support, RTOS operating system, T107 Quad-core processor at 1.0GHz, and an independent flashlight.

2. SETUP

2.1 Installing SIM Cards and Battery

1. **Remove Back Cover:** Gently pry open the back cover of the phone.
2. **Insert SIM Cards:** Locate the SIM card slots. Insert your 4G compatible SIM cards into the designated slots with the gold contacts facing down. The phone supports Dual SIM functionality.
3. **Insert Battery:** Place the 2000mAh Li-ion battery into the battery compartment, ensuring the contacts align correctly.
4. **Replace Back Cover:** Securely attach the back cover until it clicks into place.

2.2 Charging the Device

Before first use, fully charge the phone. Connect the USB Type-C cable to the phone's charging port and the other end to the provided power adapter. Plug the adapter into a wall outlet. The charging indicator will show the charging status.

2000mAh Massive Battery
Long-lasting Fun

Powered by a long-lasting 2000mAh battery, the device offers extended usage without frequent charging. you can rely on its endurance.

2000mAh

Standby Time
2 Weeks

The advertisement features a black HAMTOD H3 phone with a blue screen displaying the time 22:35 and date 01.03.2018. A large, glowing blue graphic of a 2000mAh battery is positioned behind the phone. To the right, a purple battery icon is shown above the text 'Standby Time 2 Weeks'.

Figure 3: HAMTOD H3 with 2000mAh Battery

This image illustrates the HAMTOD H3 phone alongside a graphic representing its 2000mAh battery, emphasizing its large capacity and long standby time of up to 2 weeks.

2.3 Powering On/Off

- **Power On:** Press and hold the Power/End Call button until the screen lights up.
- **Power Off:** Press and hold the Power/End Call button until the power-off options appear, then select "Power Off".

3. OPERATING INSTRUCTIONS

3.1 Basic Phone Functions

- **Making Calls:** Enter the phone number using the keypad and press the Call button (green receiver icon).
- **Answering Calls:** When an incoming call rings, press the Call button (green receiver icon) to answer.
- **Sending Messages:** Navigate to the "Messages" menu, select "New Message," enter the recipient's number and

your text, then send.

- **Navigation:** Use the directional pad and center select button to navigate through menus and options.

3.2 SOS Emergency Button

The HAMTOD H3 features a dedicated SOS button for emergencies. To set up and use:

1. **Set SOS Contacts:** Go to the "SOS Settings" menu to add emergency contact numbers.
2. **Activate SOS:** In an emergency, press and hold the SOS button (usually located on the side or back of the phone) for a few seconds. The phone will automatically call and send an emergency message to your pre-set contacts.

3.3 Flashlight Operation

The phone includes a powerful independent flashlight.

- **Turn On/Off:** A dedicated button or a long press on a specific key (refer to your phone's physical layout) activates or deactivates the flashlight.

Figure 4: HAMTOD H3 Independent Flashlight

This image shows a close-up of the HAMTOD H3 phone with its independent flashlight illuminated, casting a bright beam. This feature is

designed for easy one-click access to light in dark environments.

3.4 FM Radio

The HAMTOD H3 features an integrated FM radio.

- **Access Radio:** Navigate to the "FM Radio" application from the main menu.
- **Antenna:** The phone may use its internal antenna or require headphones to be plugged in as an antenna.
- **Scan Channels:** Use the options within the FM Radio app to scan for available stations.

4. MAINTENANCE AND CARE

4.1 IP68 Water and Dust Resistance

The HAMTOD H3 is IP68 certified, meaning it is protected against dust ingress and can withstand immersion in water up to 1.5 meters for 30 minutes. To maintain its IP68 rating:

- Ensure all port covers (e.g., USB-C port, headphone jack if present) are securely closed before exposure to water or dust.
- Do not expose the phone to high-pressure water or hot water.
- If the phone gets wet, dry it thoroughly with a clean cloth before charging or opening any ports.

IP68 certification

Built for durability and protection, certified IP68, making it resistant to water, dust, and accidental drops. It's the perfect companion for outdoor adventures and demanding work environments.

Figure 5: HAMTOD H3 IP68 Certification

This image visually represents the HAMTOD H3's IP68 certification, showing the phone partially submerged in water and also in a dusty, rocky environment, illustrating its resistance to water (up to 1.5m for 30 minutes) and dust.

4.2 Cleaning

Use a soft, dry, lint-free cloth to clean the phone's screen and body. Avoid using harsh chemicals or abrasive materials.

4.3 Drop Protection

The HAMTOD H3 is designed to be drop-proof up to 1.5 meters. While rugged, extreme impacts should still be avoided to prevent potential damage.

Unbreakable Quality

Rigorous durability tests conducted in HAMTOD lab have certified the H3 exceptional rugged construction and performance. Built with stringent quality control standards, it's designed to withstand the test of time.

Tumble Test
300+ times

Mini Drop Test
5,000+ times

Multi-angle Drop Test
200+ times

Figure 6: HAMTOD H3 Durability Testing

This image depicts the HAMTOD H3 phone in a rugged setting, surrounded by rocks, with text indicating rigorous durability tests such as Tumble Test (300+ times), Mini Drop Test (5,000+ times), and Multi-angle Drop Test (200+ times), highlighting its robust construction.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
Phone does not power on	Low battery; Battery not inserted correctly; Software issue.	Charge the phone for at least 30 minutes. Re-insert the battery. Perform a hard reset (if applicable, consult support).
No network signal	SIM card not inserted correctly; Out of network coverage; Network settings issue.	Re-insert SIM card(s). Move to an area with better coverage. Check network settings in the phone menu.
Cannot charge phone	Faulty charger/cable; Dirty charging port; Battery issue.	Try a different charger and cable. Clean the charging port gently. Ensure the battery is properly seated.
SOS button not working	SOS contacts not set; Button malfunction.	Verify SOS contacts are correctly configured in settings. If issue persists, contact support.
