## 2. SAFETY INFORMATION

**WARNING: Failure to follow these safety instructions may result in injury or damage to the product.**

- Maximum weight capacity: 110.02 pounds (approximately 50 kg). Do not exceed this limit.
- Exercise caution when adjusting the chair's height, headrest, and backrest to prevent injury to the user or client.
- Ensure all bolts and fasteners are securely tightened during assembly and regularly check for looseness during use.
- Keep hands and feet clear of moving parts during adjustment.
- Do not allow children to play on or operate the chair unsupervised.
- Place the chair on a stable, level surface to prevent tipping.

## 3. PRODUCT FEATURES

The KIIUMI Hydraulic Barber Chair is designed for professional use, offering comfort and versatility. Key

features include:

- **Flexible Adjustment:** Features a 360° swivel function, adjustable height, and a backrest that reclines up to 135°. The headrest is also adjustable.
- **Durable Structure:** Constructed with a heavy steel frame and a gold-plated appearance (for Black Gold variant), ensuring stability and longevity.
- **High-Quality Materials:** Upholstered with high-density sponge and premium PU leather for maximum comfort, durability, and easy cleaning.
- **Ergonomic Design:** Provides optimal support for the back, trunk, neck, and legs, reducing client fatigue.
- **Wide Application:** Suitable for various salon and spa services including barbering, shaving, tattooing, and esthetics.

Video 1: Official KIIUMI Barber Chair Installation Guide. This video demonstrates the step-by-step assembly process for the barber chair.

### 4.2 Step-by-Step Assembly Instructions

1. **Attach the Base:** Secure the chair's main frame to the hydraulic pump base using the provided bolts and tools. Ensure it is stable and centered.

# Product Dimensions

Figure 3: Product dimensions and ergonomic design details.

2. **Install the Seat and Backrest:** Carefully align and attach the seat and backrest components to the chair frame. Use the designated bolts and tighten them firmly.
3. **Assemble the Footrest:** Attach the footrest to the chair's frame. Ensure the pivot points are correctly aligned and secured with the provided hardware.

Figure 4: Adjustable headrest and flip foot pedal mechanism.

4. **Attach Armrests:** Secure the armrests to the sides of the chair frame.
5. **Insert Headrest:** Slide the adjustable headrest into its designated slot at the top of the backrest.

6. **Final Checks:** After assembly, test all adjustable functions (height, recline, swivel) to ensure smooth operation and stability.

## 5. OPERATING INSTRUCTIONS

Your KIIUMI Hydraulic Barber Chair offers several adjustable features for optimal client comfort and stylist convenience.

- **Height Adjustment:** Use the hydraulic pump lever (typically located on the side of the base) to raise or lower the chair. Press down on the lever to lower, and pump the lever to raise.
- **Reclining Backrest:** Locate the reclining lever (usually on the side of the chair, near the armrest). Pull the lever to release the backrest and adjust it to the desired angle (up to 135°). Release the lever to lock the position.

Figure 5: Backrest reclining mechanism and adjustable angles.

- **Adjustable Headrest:** The headrest can be pulled up or pushed down to adjust its height. Some models may have a locking mechanism; ensure it is secure after adjustment.
- **Footrest Operation:** The footrest can be extended or retracted, often in conjunction with the reclining backrest. Some models feature a flip-up foot pedal for additional support.
- **360° Swivel:** The chair can rotate 360 degrees. Some models include a locking mechanism to fix the chair in position.

## 360° Swivel and Lock

## 6. MAINTENANCE

Regular maintenance will extend the life and appearance of your barber chair.

- **Cleaning:** Wipe down the PU leather upholstery with a soft, damp cloth and mild soap. Avoid harsh chemicals or abrasive cleaners that can damage the material.

# High Quality Leather

Figure 7: High-quality PU leather, easy to clean and maintain.

- **Metal Parts:** Clean chrome and metal parts with a soft cloth and a non-abrasive metal cleaner if necessary.
- **Hydraulic System:** Periodically check the hydraulic pump for leaks or unusual operation. If issues arise, consult a qualified technician.
- **Fasteners:** Regularly inspect all bolts and screws to ensure they are tight. Re-tighten as needed to maintain stability.

## 7. TROUBLESHOOTING

If you encounter any issues with your barber chair, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Chair does not raise or lower smoothly.	Low hydraulic fluid, air in the hydraulic system, or a faulty pump.	Ensure the hydraulic lever is fully engaged. If the problem persists, contact customer support for assistance. Do not attempt to repair the hydraulic system yourself.

Problem	Possible Cause	Solution
Backrest is difficult to recline or does not stay in position.	Reclining mechanism is stiff, worn, or improperly engaged.	Check the reclining lever for obstructions. Apply a small amount of silicone lubricant to the pivot points if stiff. Ensure the lever is fully released to lock the position.
Chair wobbles or feels unstable.	Loose bolts or uneven floor surface.	Inspect and tighten all assembly bolts, especially those connecting the chair to the base. Ensure the chair is on a flat, stable surface.
Headrest is loose or does not stay in position.	Locking mechanism is not engaged or is faulty.	Ensure the headrest is fully inserted and any locking pins or levers are engaged. If it continues to be loose, inspect the mechanism for damage.

## 8. SPECIFICATIONS

Detailed specifications for the KIIUMI Hydraulic Barber Chair, Model FGY-10002:

- **Model Number:** FGY-10002
- **Brand:** KIIUMI
- **Color:** Black Silver (as reviewed, other variants may exist)
- **Product Dimensions (Overall):** 41.3"D x 26"W x 38.6"H (104.9 cm D x 66 cm W x 98 cm H)
- **Weight:** 110.02 Pounds (approximately 50 kg)
- **Maximum Weight Capacity:** 110.02 pounds (approximately 50 kg) - *Note: This seems low for a barber chair, please verify with manufacturer if heavy-duty use is intended. The feature bullet mentions 440lbs loading bearing, which contradicts the safety info. I will use the safety info as it's a direct warning, but add a note.*
- **Back Style:** Solid Back
- **UPC:** 644197131033
- **ASIN:** B0DPM8DGWW

**Note on Weight Capacity:** The product features mention a "440lbs Loading Bearing" while the safety information states "Maximum weight capacity: 110.02 pounds". Please refer to the manufacturer's official documentation or contact KIIUMI directly for clarification on the correct maximum weight capacity, especially for heavy-duty professional use.

## 9. WARRANTY AND SUPPORT

For warranty information, product support, or to purchase replacement parts, please contact KIIUMI customer service or visit the official KIIUMI store.
