## 4. SETUP GUIDE

---

### 4.1. Powering On

1. Unpack the camera and all accessories.
2. Connect the power adapter to the camera's power input port.
3. Plug the power adapter into a standard electrical outlet. The camera will power on and initiate its startup sequence.

### 4.2. App Download and Account Registration

1. Download the recommended mobile application (e.g., Tuya Smart or Smart Life app) from your device's app store (App Store for iOS, Google Play Store for Android).
2. Open the app and register for a new account if you don't have one, or log in with an existing account.

### 4.3. Connecting to Wi-Fi

1. Ensure your smartphone is connected to a 2.4GHz Wi-Fi network. **The K16 camera only supports 2.4GHz Wi-Fi.**
2. In the app, tap 'Add Device' or the '+' icon.
3. Select 'Security Camera' or 'Smart Camera' from the device list.
4. Follow the on-screen instructions to put the camera into pairing mode (usually indicated by a flashing light).
5. Enter your 2.4GHz Wi-Fi network password when prompted.
6. The app will generate a QR code. Hold your phone with the QR code in front of the camera lens at a distance of 6-8 inches until you hear a prompt indicating successful connection.
7. Once connected, you can name your camera and begin using it.

## 5. OPERATING INSTRUCTIONS

---

### 5.1. Live View and Playback

- Open the mobile app and select your K16 camera from the device list to access the live view.
- Use the on-screen controls to pan (280° horizontal) and tilt (155° vertical) the camera to adjust its viewing

angle.

- Access recorded footage via the 'Playback' or 'History' section in the app. You can filter by date and time.

## 5.2. Two-Way Audio Communication

- While in live view, tap the microphone icon to initiate two-way audio.
- Speak into your phone's microphone to transmit your voice through the camera's speaker.
- The camera's microphone will pick up audio from its surroundings, which you can hear through your phone.

## 5.3. Smart Alarm and AI Detection Settings

- Navigate to the camera settings in the app.
- Enable 'Motion Detection' and adjust sensitivity levels as needed.
- Configure 'Alarm Notifications' to receive alerts on your phone when motion is detected.
- Utilize 'AI Detection' features to specify detection types (Human, Vehicle, Pet) to minimize irrelevant alerts.

## 5.4. Storage Management

- **TF Card Storage:** Insert a TF (microSD) card (up to 128GB) into the designated slot on the camera. Ensure the card is inserted correctly. *Note: There is a slot on the bottom that resembles an SD card slot but is not; inserting a card there may cause it to fall inside the camera. Refer to the manual's diagram for the correct slot.*
- **Cloud Storage:** Follow the in-app instructions to subscribe to cloud storage services for continuous recording and remote access to footage.

## 5.5. Smart Assistant Integration (Alexa/Google Assistant)

- In the mobile app, go to 'Me' or 'Profile' and find 'Third-Party Services' or 'Smart Integrations'.
- Select Amazon Alexa or Google Assistant and follow the linking instructions.
- Once linked, you can use voice commands (e.g., "Alexa, show me the front door camera") to view your camera feed on compatible smart displays.

# 6. MAINTENANCE

---

## 6.1. Cleaning

- Ensure the camera is powered off before cleaning.
- Use a soft, dry cloth to wipe the camera body.
- For the lens, use a specialized lens cleaning cloth to avoid scratches. Do not use harsh chemicals or abrasive cleaners.

## 6.2. Environmental Considerations

- While the camera is IP65 weatherproof, avoid submerging it in water.
- Ensure the operating temperature and humidity remain within the specified ranges (-4°F to 140°F / -20°C to 60°C and 10% ~ 95% non-condensing).

# 7. TROUBLESHOOTING

---

## 7.1. Camera Not Powering On

- Check if the power adapter is securely connected to both the camera and the power outlet.
- Verify that the power outlet is functional.

## 7.2. Unable to Connect to Wi-Fi

- Ensure your Wi-Fi network is 2.4GHz. The camera does not support 5GHz Wi-Fi.
- Check your Wi-Fi password for accuracy.
- Move the camera closer to your Wi-Fi router to improve signal strength.
- Restart your router and the camera.

## 7.3. No Motion Detection or Recording

- Verify that motion detection is enabled in the app settings.
- Adjust motion detection sensitivity.
- Ensure the TF card is correctly inserted and formatted (if using local storage).
- Check your cloud storage subscription status if using cloud recording.

## 7.4. Two-Way Audio Issues

- Ensure your phone's volume is up and the microphone is not muted in the app.
- Check the camera's volume settings in the app.
- Ensure there is no obstruction blocking the camera's microphone or speaker.

## 7.5. SD Card Falls Inside Camera

- There is a slot on the bottom of the camera that is NOT for the SD card. Inserting an SD card into this slot will cause it to fall inside.
- Always refer to the product diagram or specific instructions for the correct TF card slot location. If a card has fallen inside, professional assistance may be required to retrieve it.
