CARE AND MAINTENANCE

To maintain the appearance and longevity of your WEUP bed frame, follow these care instructions:

- **Cleaning the Fabric:** For general cleaning, gently vacuum the boucle fabric to remove dust and debris. For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner and test on an inconspicuous area first.
- **Frame Care:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight may cause the fabric to fade.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners or harsh chemicals on the fabric or frame, as this may cause damage.

TROUBLESHOOTING

If you encounter any issues with your bed frame, please refer to the following common solutions:

- **Squeaking Noises:** Ensure all bolts and screws are securely tightened. The bed frame is designed with a mute bar and Velcro slats to minimize noise; if squeaking persists, re-check the slat placement and connections.
- **Instability:** Verify that all frame components are correctly assembled and all fasteners are tight. Ensure the bed frame is placed on a flat, level surface.
- **Headboard Not Adjusting:** Check that the adjustment mechanism is free from obstructions and that the bolts are loosened sufficiently before attempting to change the height. Re-tighten securely after adjustment.
