TSAR BOMBA 2024-8219

TSAR BOMBA Women's Watch Instruction Manual

Model: 2024-8219

1. Introduction

This manual provides essential information for the proper use, care, and maintenance of your TSAR BOMBA Women's Watch, Model 2024-8219. Please read these instructions carefully to ensure optimal performance and longevity of your timepiece. Keep this manual for future reference.

2. Product Overview

The TSAR BOMBA Women's Watch combines a distinctive tonneau design with reliable Swiss Quartz movement and durable materials. Key features include a sapphire glass crystal, luminous hands, and a fluorine rubber strap.

2.1 Components

- **Case:** Transparent, tonneau-shaped, housing the watch movement.
- **Crown:** Located on the side of the case, used for setting the time.
- **Dial:** Features hour markers, minute track, and decorative elements.
- **Hands:** Hour, minute, and second hands, with luminous coating for visibility in low light.
- **Sapphire Glass:** Highly scratch-resistant crystal protecting the dial.
- **Strap:** Made from fluorine rubber, known for its softness, comfort, and durability.
- **Case Back:** Stainless steel, engraved with model information and water resistance rating.

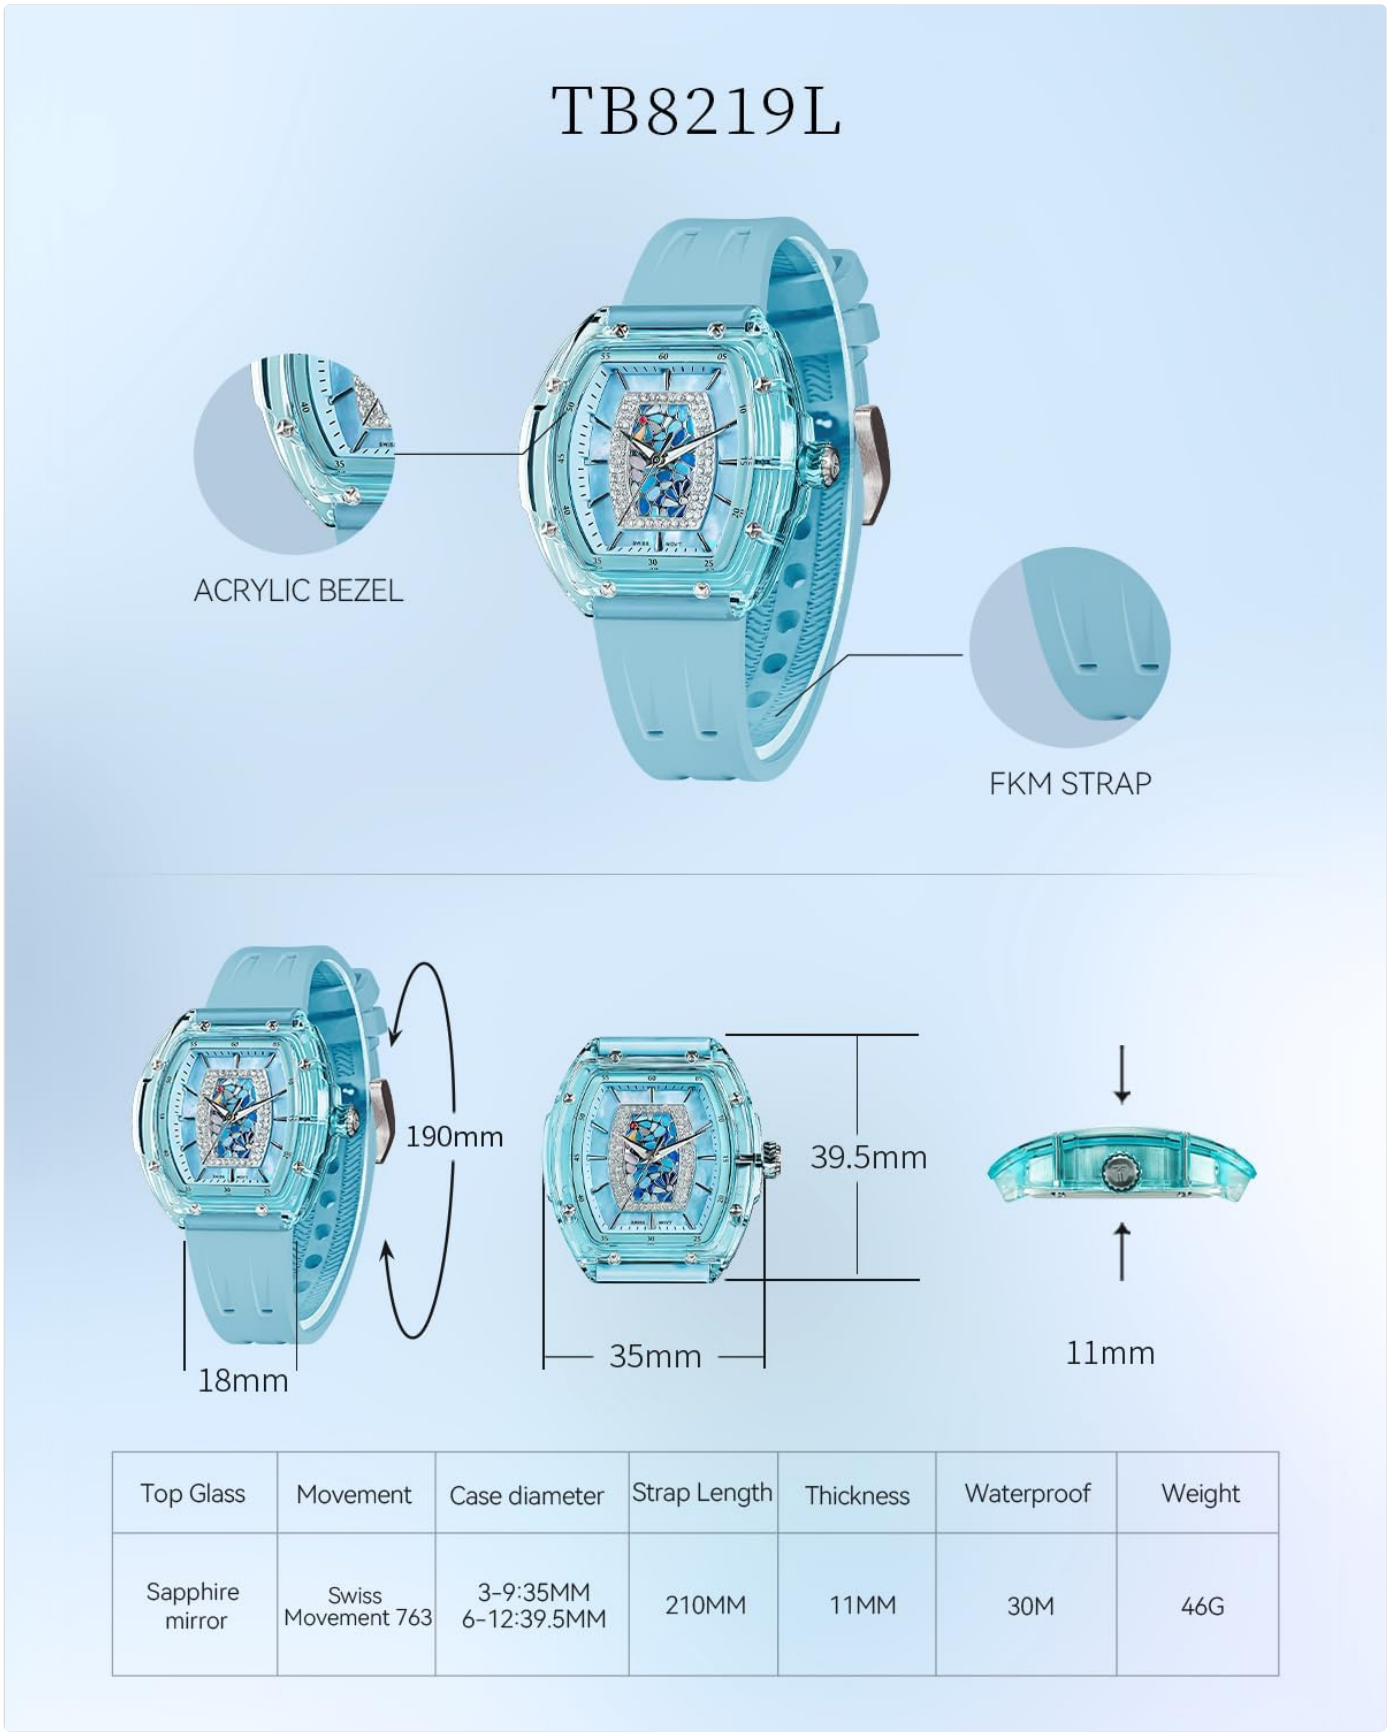

2.2 Visual Guide

3. Setup

3.1 Initial Inspection

Upon unboxing, carefully inspect the watch for any protective films on the crystal or case back. Remove these films before use. Ensure the crown is pushed in fully to prevent moisture ingress.

3.2 Adjusting the Strap

The fluorine rubber strap features a traditional buckle clasp. Adjust the strap length by inserting the pin into the appropriate hole for a comfortable and secure fit on your wrist.

4. Operating Instructions

4.1 Setting the Time

1. Gently pull the crown outwards to the time-setting position.
2. Rotate the crown clockwise or counter-clockwise to move the hands and set the desired time.
3. Once the time is set, push the crown back in fully to its original position. This engages the movement and ensures water resistance.

4.2 Water Resistance

This watch is rated for 30 meters (3 ATM) of water resistance. This means it is suitable for everyday use and can withstand splashes, rain, and brief immersion in water. It is **not** suitable for swimming, showering, diving, or any water sports where the watch might be subjected to significant water pressure or prolonged immersion.

- Do not operate the crown while the watch is wet or submerged.
- Avoid exposing the watch to hot water or steam, as this can compromise seals.

4.3 Luminous Display

The watch hands feature a luminous coating that absorbs light and glows in low-light conditions, allowing for easy time reading in the dark. The intensity and duration of the glow depend on the exposure to light.

5. Maintenance

5.1 Cleaning

To clean your watch, wipe the case and strap with a soft, damp cloth. For the fluorine rubber strap, mild soap and water can be used. Ensure the watch is completely dry before wearing. Avoid using harsh chemicals or abrasive materials.

5.2 Battery Replacement

The watch is powered by one LR44 battery. When the watch stops running, it indicates the battery needs replacement. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and maintain water resistance.

5.3 General Care

- Avoid exposing the watch to extreme temperatures (hot or cold) or sudden temperature changes.
- Protect the watch from strong impacts or shocks.
- Keep the watch away from strong magnetic fields, which can affect the accuracy of the quartz movement.

6. Troubleshooting

- **Watch not running:** Check if the crown is pushed in fully. If it is, the battery may need replacement.
- **Time inaccuracy:** Ensure the crown is fully pushed in. If the issue persists, the battery may be low, or the movement may require inspection by a professional.
- **Condensation under crystal:** This indicates a loss of water resistance. Immediately seek professional service to prevent further damage.

7. Specifications

Feature	Specification
Model Number	2024-8219
Movement	Swiss Quartz Movement 763
Top Glass	Sapphire Mirror
Water Resistance	30 Meters (3 ATM)
Battery Type	1 x LR44 (included)
Case Diameter	39.5mm
Strap Length	210mm
Thickness	11mm
Weight	46g
Clasp Type	Buckle
