Tebild ZX001

Tebild ZX001 True HEPA Replacement Filter Instruction Manual

Model: ZX001

INTRODUCTION

This manual provides essential information for the proper installation, operation, and maintenance of your Tebild ZX001 True HEPA Replacement Filter. Please read these instructions carefully to ensure optimal performance and longevity of your filter.

COMPATIBILITY

The ZX001 replacement filter is specifically designed for use with **TEBILD ZX001 air purifiers only**. It is crucial to verify your air purifier's model number before purchasing and installing this filter. This filter is not compatible with air purifiers from other brands.

Compatible with TEBILD ZX001 Smart Air Purifier

PRODUCT FEATURES

The TEBILD ZX001 replacement filter features a 3-in-1 filtration system designed to improve air quality in your home or office:

- **H13 True HEPA Filter:** Effectively captures large airborne particles such as dust, pet dander, and fabric fibers, as well as particles as small as 0.3 microns.
- **High-Efficiency Activated Carbon Filter:** Removes over 99.7% of common odors from sources like food, cigarettes, and pets, along with volatile organic compounds (VOCs).
- **Integrated Design:** This 3-in-1 filter unit is designed for easy, tool-free replacement.

Upgraded 3-stage Filtration System

Designed to efficiently filter particles as small as 0.3 microns for cleaner air.

SETUP: FILTER REPLACEMENT

For optimal performance, it is recommended to replace the filter every 3 to 6 months, depending on usage and air quality. The air purifier will typically have an indicator to notify you when a replacement is due.

1. **Check Filter Indicator:** Your TEBILD ZX001 air purifier will display an indicator when it's time to replace the filter.
2. **Prepare for Replacement:** Unplug the air purifier from the power outlet.
3. **Remove Old Filter:** Carefully remove the front cover of the air purifier and extract the used filter.
4. **Install New Filter:** Insert the new ZX001 replacement filter into the air purifier, ensuring it is seated correctly. Replace the front cover.
5. **Reset Filter Life:** After installing the new filter, plug the air purifier back in. Press and hold the filter reset button on the control panel for approximately 3 seconds until the indicator light turns off or resets, confirming the new filter life cycle has begun.

OPERATING: FILTER LIFESPAN

The TEBILD ZX001 replacement filter is designed for a lifespan of 3 to 6 months under normal operating conditions. Factors such as air quality, frequency of use, and presence of pets or smokers can influence the actual filter life. Always refer to your air purifier's filter indicator for the most accurate replacement timing.

MAINTENANCE

The Tebild ZX001 True HEPA and Activated Carbon replacement filter is a sealed unit and **is not washable**. Attempting to wash the filter will damage its filtration capabilities and may release trapped pollutants. For optimal performance, replace the entire filter unit as instructed.

TROUBLESHOOTING

If you encounter any issues with your replacement filter or air purifier after installation, consider the following:

- **Filter Indicator Still On:** Ensure the filter is correctly installed and the filter reset button has been pressed and held for 3 seconds.
- **Reduced Airflow or Odor:** This may indicate the filter is heavily soiled and requires replacement, even if the indicator has not yet activated.
- **Unusual Noises:** Check that the filter is properly seated and the air purifier cover is securely closed.
