KOMFOTT Double Twin Floor House Bed

INSTRUCTION MANUAL

Model: 11006-HU-KT

Product Overview

The KOMFOTT Double Twin Floor House Bed is designed to provide a safe and imaginative sleeping space for two children. Crafted from natural pine wood, this bed frame offers durability and a charming aesthetic. Its unique house-shaped design encourages creativity, allowing for personalization with various decorations. The low-profile structure and integrated safety guardrails ensure easy access and enhanced security for young users.

Safety Information

Please read and understand all safety instructions before assembly and use. Failure to follow these guidelines may result in injury or damage to the product.

- **Weight Limit:** Do not exceed the maximum weight capacity of **250 lbs** for the entire bed frame. This limit applies to the combined weight of occupants and bedding.
- **Assembly:** Always assemble the bed frame according to the provided instructions. Ensure all hardware is securely tightened before use. Periodically check and re-tighten fasteners as needed.
- **Mattress Compatibility:** Use only twin-sized mattresses with a recommended thickness of **6 inches or less**. Thicker mattresses may compromise the effectiveness of the safety guardrails.
- **Guardrails:** The 17-inch safety guardrails are designed to protect children. Ensure no gaps exist between the mattress and the guardrails that could pose an entrapment hazard.

- **Low Profile Design:** The bed's 5-inch low profile is designed for easy access for children. Ensure the area around the bed is clear to prevent tripping hazards.
- **Supervision:** Always supervise young children when they are using the bed, especially during initial use.
- **Modifications:** Do not modify the bed frame in any way. Unauthorized modifications can compromise the structural integrity and safety of the product.
- **Flammability:** Keep the bed away from open flames or direct heat sources.

Components List

Before beginning assembly, verify that all parts are present and undamaged. If any components are missing or damaged, please contact customer support.

- Bed Frame Components (various wooden beams and posts)
- Plywood Slats (7+7 for each twin bed)
- Safety Guardrails
- Assembly Hardware (screws, bolts, nuts, etc.)
- User Manual (this document)

Setup and Assembly

Assembly of the KOMFOTT Double Twin Floor House Bed requires two adults and approximately 2 hours. Please follow these steps carefully.

1. **Prepare the Area:** Clear a spacious area for assembly. Lay down a blanket or cardboard to protect your floor and the bed components from scratches.
2. **Identify Components:** Unpack all components and identify them using the provided parts list. Group similar parts together.
3. **Assemble the Base Frames:** Begin by assembling the two individual twin bed base frames. Connect the side rails and end rails using the designated hardware. Ensure all connections are secure but do not fully tighten yet.
4. **Install Slats:** Once the base frames are partially assembled, insert the plywood slats into the designated slots or attach them to the support beams. Ensure the slats are evenly spaced and firmly in place.

Figure 3: Reliable Support System. This image illustrates the 7+7 plywood slats providing sturdy mattress support and the strong connections of the bed frame.

5. **Attach Guardrails:** Securely attach the safety guardrails to the sides of each bed frame. Ensure they are oriented correctly and all fasteners are tightened.
6. **Construct the House Roof Structure:** Assemble the vertical posts and the roof beams according to the diagrams

in the separate assembly guide (if provided, otherwise assume integrated). Connect these to the assembled bed bases.

7. **Final Tightening:** Once all components are in place and aligned, systematically tighten all screws and bolts. Do not overtighten, but ensure all connections are firm and stable.
8. **Placement:** Position the assembled bed in its desired location, ensuring it is on a flat, stable surface.

Operating and Usage

The KOMFOTT Double Twin Floor House Bed is designed for comfortable and safe use by children.

- **Mattress Installation:** Place two twin-sized mattresses onto the plywood slats. Ensure they fit snugly within the frame and against the guardrails.
- **Low Profile Access:** The bed's 5-inch ground clearance allows children to easily climb in and out independently.

Figure 4: Low Profile and Safety Guardrails. This image highlights the bed's low height for easy access and the protective height of the guardrails.

- **Personalization:** The unique house roof design can be customized with light strips, colorful flags, canopies, or other decorations to create a personalized space for your child.

Figure 5: DIY-able Montessori Bed with Roof. This image showcases various decorative options like light strips, flags, and canopies that can be added to the bed's roof structure.

- **Shared Sleeping Space:** This bed is ideal for siblings or twins, providing individual sleeping areas within a shared room.

Maintenance

Proper care and maintenance will extend the life of your KOMFOTT Double Twin Floor House Bed.

- **Cleaning:** Wipe the wooden surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the finish.
- **Dusting:** Regularly dust the bed frame to prevent buildup.
- **Hardware Check:** Periodically inspect all screws, bolts, and connections to ensure they remain tight. Re-tighten any loose hardware to maintain stability and safety.
- **Wood Care:** As the bed is made of natural pine wood, avoid placing it in direct sunlight or near heat sources that could cause the wood to dry out or crack.

Troubleshooting

If you encounter any issues with your bed frame, refer to the following common solutions:

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose hardware connections.	Inspect all screws and bolts. Tighten any loose fasteners using the appropriate tools. Ensure the bed is on a level surface.
Slats are creaking or shifting.	Slats not properly seated or damaged.	Ensure each slat is fully inserted into its designated slot or securely attached. Replace any damaged slats if necessary.
Mattress does not fit correctly.	Incorrect mattress size or thickness.	Verify that you are using two standard twin-sized mattresses. Ensure mattress thickness does not exceed 6 inches.
Visible scratches or minor cosmetic damage.	During shipping or assembly.	For minor scratches, a wood repair kit or touch-up paint (matching white) can be used. For significant damage, contact customer support.

Specifications

Detailed specifications for the KOMFOTT Double Twin Floor House Bed.

Figure 6: Product Dimensions and Weight Capacity. This image provides a visual representation of the bed's overall dimensions and highlights the 250 lbs weight capacity.

Feature	Detail
