## Care and Maintenance

- **Cleaning:** The melamine-faced surface of the shelves is easy to clean. Wipe with a damp cloth and mild detergent if necessary. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Dusting:** Regularly dust the shelves and frame with a soft, dry cloth to prevent buildup.
- **Inspection:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary to maintain stability.
- **Avoid Moisture:** While the melamine finish offers some protection, avoid prolonged exposure to excessive moisture to prevent warping or damage to the particle board.

## Troubleshooting

---

- **Shelf feels wobbly after installation:** Ensure all mounting screws are securely fastened to the wall and that appropriate wall anchors were used for your wall type. Check all internal assembly screws for tightness.
- **Items slide off the shelf:** Ensure the shelf is installed level. For the upper shelf, utilize the integrated

guardrails to prevent items from falling.
