- **Hardware Check:** Periodically check all screws and bolts to ensure they are tight. Re-tighten if necessary to maintain stability.

If you encounter any issues with your chair, refer to the following common problems and solutions:

- **Chair Sinks or Won't Stay Up:** The gas lift cylinder may be faulty. Contact customer support for a replacement.
- **Chair Squeaks:** Check and tighten all assembly screws. A small amount of lubricant can be applied to moving parts if the squeaking persists.
- **Casters Not Rolling Smoothly:** Remove any hair or debris from the casters. If they are still stiff, they may need replacement.
