4.2. Inserting the TF Card

The camera comes with a pre-installed TF card. If you need to replace it or re-insert it, gently push the TF card into the designated slot until it clicks into place. Ensure the card is inserted correctly to avoid damage. The camera supports Micro SD cards up to 128GB.

Note: It is recommended to format the TF card to FAT32 before initial use or if you encounter recording issues. This can typically be done by connecting the camera to a computer or using the provided card reader.

5. OPERATING INSTRUCTIONS

The BOBLOV 007 Mini Body Camera features a simple three-button interface for various functions.
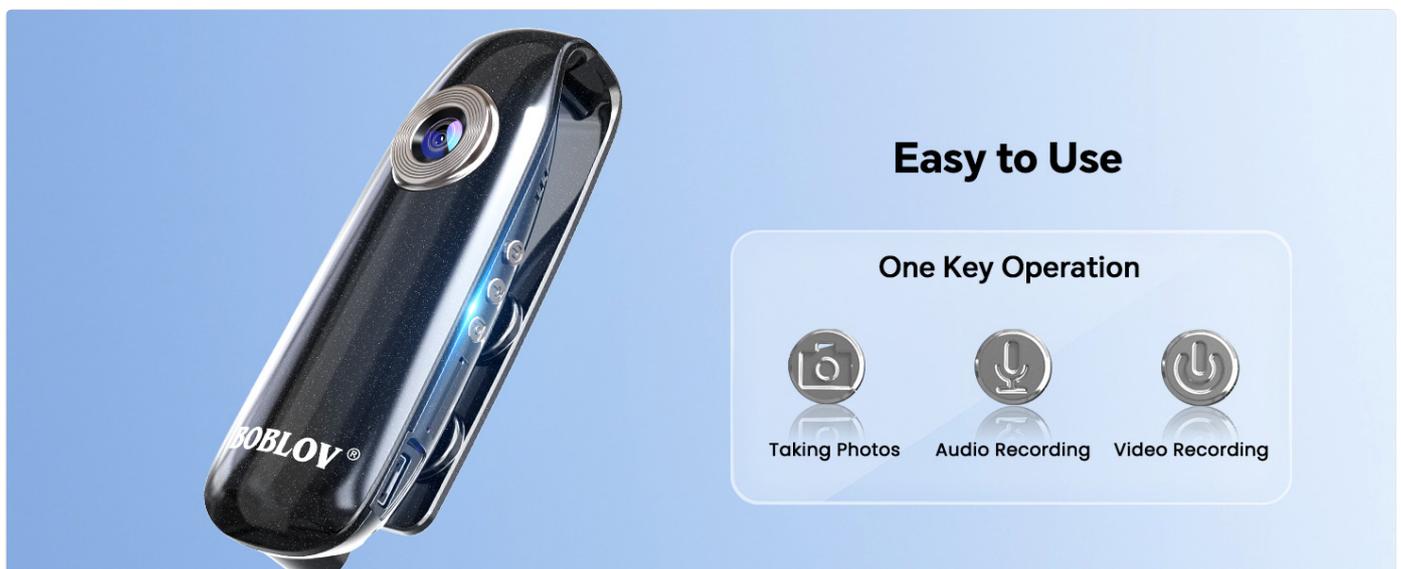

Image: A close-up of the camera highlighting the three main function buttons: Photo, Audio Recording, and Video Recording.

5.1. Power On/Off

- To Power On: Press and hold the Power button (usually the top button) until the indicator light turns on.
- To Power Off: Press and hold the Power button until the indicator light turns off.

5.2. Video Recording

- To Start Recording: After powering on, press the Video Recording button (typically the middle button) once. The indicator light will change to indicate recording is in progress.

- To Stop Recording: Press the Video Recording button again. The indicator light will revert to standby mode.

- The camera records in 1080P resolution.

5.3. Audio Recording (Non-Video)

- To Start Audio Recording: After powering on, press the Audio Recording button (usually the bottom button) once.

- To Stop Audio Recording: Press the Audio Recording button again.

5.4. Taking Snapshots (Photos)

- To Take a Photo: After powering on, press the Snapshot button (often the top button, or a dedicated photo button) once.

5.5. Accessing Files

To access recorded videos and audio files, connect the camera to your computer using the provided USB cable or remove the TF card and insert it into the included card reader, then connect the card reader to your computer. The camera will appear as a removable disk drive, allowing you to browse and transfer files.

5.6. Loop Recording Function

The camera supports loop recording. When the TF card is full, the oldest files will automatically be overwritten by new recordings. This ensures continuous recording without interruption, eliminating the need for manual deletion of old files.

6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth. Avoid using liquid cleaners or abrasive materials.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge the camera regularly, even if not in use for extended periods.
- **Firmware Updates:** Check the official BOBLOV website periodically for any available firmware updates that may improve performance or add new features.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on.	Low battery; device malfunction.	Charge the camera fully. If problem persists, contact support.
Recording stops unexpectedly.	TF card full; card error; low battery.	Check TF card storage. Format TF card to FAT32. Ensure battery is charged.
Poor video/audio quality.	Dirty lens; improper lighting; environmental noise.	Clean the lens. Ensure adequate lighting. Minimize background noise for audio.
Date/Time stamp is incorrect.	Time synchronization issue.	Connect the camera to a computer and set the time via the configuration file (refer to advanced settings in the full manual if available).
Camera not recognized by computer.	Faulty USB cable; driver issue; incorrect connection.	Try a different USB port or cable. Ensure the camera is powered on when connected. Try using the external card reader.
