CAFELFFE AC-516F

CAFELFFE MK606 5-in-1 Coffee Machine Instruction Manual

1. INTRODUCTION

The CAFELFFE MK606 is a versatile 5-in-1 coffee machine designed to brew a variety of coffee beverages. It supports Nespresso original capsules, Dolce Gusto capsules, K-Cup capsules, ESE pods, and ground coffee. Featuring a 19-bar pressure pump and options for both hot and cold extraction, this machine offers convenience and flexibility for your coffee preferences.

5 Adapters For 5 Coffee Systems

There is always one for you

2. SAFETY INSTRUCTIONS

- **Automatic Shut-off:** The machine automatically turns off after 15 minutes of inactivity to conserve energy and enhance safety.
- **Dry Protection:** The machine is equipped with dry protection to prevent damage if the water tank runs empty during operation.
- **Water Tank:** The removable water tank has a capacity of 600 ml and is BPA-free. Ensure it is properly seated before use.

- **Power Supply:** Use with AC 220-240 V, 60 Hz power standards.
- **Cup Size:** Accommodates cups or glasses up to 9.5 cm in height when the drip tray is removed.

3. PRODUCT COMPONENTS

The CAFELFFE MK606 coffee machine includes the main unit, a removable water tank, and various adapters for different coffee types. A milk frother is also included for preparing milk-based beverages.

- Main Coffee Machine Unit
- Removable Water Tank (600ml)
- Nespresso Capsule Adapter
- Dolce Gusto Capsule Adapter
- K-Cup Capsule Adapter
- ESE Pods Adapter
- Ground Coffee Adapter
- Milk Frother
- Cleaning Punch Pen

7 Preset Brewing Volume & Reference Guide

4. SETUP

4.1 Initial Preparation

1. Unpack the coffee machine and all its components.
2. Wash the water tank and drip tray with warm, soapy water, then rinse thoroughly.
3. Fill the water tank with fresh, clean water.

4.2 First Use (Priming the Machine)

Before brewing coffee for the first time, it is essential to prime the machine to ensure the internal circuit is filled with water.

1. Insert the provided pipe into the water entrance of the machine.
2. Fill the water tank and inject water from the pipe into the machine until the internal circuit is full.
3. Perform a rinse cycle without any coffee capsule or ground coffee. Place a cup under the dispenser, press the power button, and let water run through. Repeat this process 2-3 times.

Image 4.1: Priming the machine by injecting water into the internal circuit before first use.

5. OPERATING INSTRUCTIONS

5.1 Powering On

Press the On/Off button to power on the machine. The indicator lights will illuminate.

5.2 Selecting Coffee Type and Adapter

Choose the appropriate adapter for your desired coffee type (Nespresso, Dolce Gusto, K-Cup, ESE pod, or ground coffee). Open the adapter accessory, insert the capsule or ground coffee, and then insert the adapter into the machine. Press the handle down to secure it.

5.3 Setting Brewing Volume

The machine offers 7 preset brewing volumes. Observe the suggested water volume on your capsule (if applicable) or adjust according to your preference. Use the volume selection buttons to choose the desired amount of coffee.

Image 5.1: Reference guide for 7 preset brewing volumes, indicating suggested times for various capsule types.

7 LEVELS, 7 PERFECT RECIPES

Match water volume to capsule instructions for barista-level precision. Customize your own brew strength with intuitive Coffee Volume Button

Image 5.2: Detailed chart showing 7 water volume levels and corresponding coffee recipes.

5.4 Hot Brew Mode

1. Ensure the machine is powered on. The hot brew mode is the default.
2. The machine will preheat for approximately 35 seconds.
3. Place your coffee cup under the dispenser.
4. Press the coffee button to start brewing.

5.5 Cold Brew Mode

1. With the machine powered on, press and hold the On/Off button for 2 seconds to enter cold brew mode. The cold brew indicator light will illuminate.
2. Add ice cubes to your cup first, if desired.
3. Place your cup under the dispenser.
4. Press the coffee button to start brewing. The machine will brew directly without preheating.

Image 5.3: Instructions for activating Hot Drink Mode and Cold Drink Mode.

5.6 Preparing Milk-Based Beverages (Latte/Cappuccino)

To create a latte or cappuccino, use the included milk frother to prepare milk foam. Brew your coffee first, then add the frothed milk.

1. Brew your coffee using the desired capsule or ground coffee.
2. Pour whole milk into the milk frother.
3. Press the button on the milk frother to create dense milk bubbles.
4. Once the milk is frothed, pour it into your brewed coffee.
5. Optionally, sprinkle with cocoa powder for garnish.

6. MAINTENANCE AND CLEANING

6.1 Cleaning the Dolce Gusto (DG) Adapter

If you notice that the DG capsule adapter is not extracting coffee properly, the nozzle may be clogged.

- Use the provided punch pen to clean the pouring nozzle on the DG adapter.
- Carefully insert the pen into the nozzle to clear any blockages.

DG ADAPTER USAGE & CLEANING

Use the cleaning needle to clean the pouring nozzle on the DG adapter

Image 6.1: Instructions for cleaning the DG adapter's pouring nozzle using the cleaning pen.

6.2 Descaling

Regular descaling is important to maintain machine performance and extend its lifespan.

1. Add a mixture of water and a standard descaling liquid for coffee machines to the water tank.
2. Place a large container under the coffee dispenser.
3. Press the coffee volume button to run the descaling solution through the machine.
4. Repeat this process several times until the water tank is empty.
5. Rinse the water tank and run several cycles with fresh water to remove any descaling residue.

6.3 General Cleaning

- Wipe the exterior of the machine with a damp cloth.
- Regularly empty and clean the drip tray.
- Wash the water tank and adapters after each use or as needed.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
No coffee extraction	Water tank empty; Adapter nozzle clogged; Machine not primed.	Fill water tank; Clean DG adapter nozzle with punch pen; Perform initial priming steps.
Coffee is cold	Cold brew mode activated; Insufficient preheating.	Ensure cold brew mode is off for hot coffee; Allow 35 seconds for preheating in hot brew mode.
Machine not turning on	Not plugged in; Power outlet issue.	Check power connection; Try a different outlet.

Problem	Possible Cause	Solution
Weak coffee	Incorrect water volume selected; Old coffee grounds/capsule.	Adjust water volume to a lower setting; Use fresh coffee.
