## 4. SETUP

### 4.1 Initial Pairing and Gateway Requirement

The Shelly BLU RC Button 4 requires a compatible gateway for use with the Shelly Smart Control app and for integration into your smart home system. Compatible gateways include the Shelly BLU Gateway, or any Shelly Plus, Pro, or Gen3 device.

1. **Ensure Gateway is Active:** Make sure your Shelly BLU Gateway or other compatible Shelly device (Plus, Pro, Gen3) is powered on and connected to your network.
2. **Open Shelly Smart Control App:** Download and open the Shelly Smart Control app on your iOS or Android device.
3. **Add Device:** Follow the in-app instructions to add a new device. The app will guide you through the pairing process for the Shelly BLU RC Button 4.

4. **Configure Actions:** Once paired, you can configure the 16 possible actions (single, double, triple, and long presses for each of the four buttons) within the Shelly Smart Control app to control specific devices or activate scenes.

## 4.2 Placement Options

The Shelly BLU RC Button 4 offers flexible placement options due to its design and included accessories:

- **On a Wall:** Use the included 3M adhesive patch to mount the button securely on any flat wall surface.
- **Stand-alone:** Its compact size allows you to carry it in your pocket for portable control.
- **On Metal Surfaces:** The integrated magnets allow it to stick to metal surfaces like refrigerators or magnetic boards.
- **With Adapter:** It is compatible with US wall plate covers using an appropriate adapter (sold separately), allowing for integration into existing switch setups.

## 5. OPERATING THE SHELLY BLU RC BUTTON 4

The Shelly BLU RC Button 4 provides intuitive control over your smart home devices and scenes through its multi-click functionality.

## 5.1 Multi-Click Functionality

Each of the four buttons on the Shelly BLU RC Button 4 supports multiple click combinations, allowing for up to 16 different actions:

- **Single Press:** A quick press and release.
- **Double Press:** Two quick presses in succession.
- **Triple Press:** Three quick presses in succession.
- **Long Press:** Press and hold the button for a specified duration (configurable in the app).

Image: A visual representation of the Shelly BLU RC Button 4's multi-click capability, illustrating how it performs up to 16 different actions using single, double, triple, and long presses.

## 5.2 Controlling Smart Home Elements

Once configured in the Shelly Smart Control app, the Shelly BLU RC Button 4 can control a wide range of smart home functions:

- **Lights Control:** Turn lights on/off, adjust brightness (dimming), or change color (if supported by your smart lights).
- **Blinds/Curtains:** Easily open or close motorized blinds, roller shutters, or curtains. A single press can move them fully, while a long press can adjust them to a desired intermediate level.
- **Appliance Control:** Turn smart appliances on or off.
- **Scene Activation:** Trigger pre-defined smart scenes, such as "Movie Night" (dims lights, closes blinds) or "Good Morning" (opens blinds, turns on coffee maker).
- **Garage Door Control:** Open or close your smart garage door.

## 6. MAINTENANCE

### 6.1 Cleaning

To clean your Shelly BLU RC Button 4, gently wipe it with a soft, dry cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the device's surface or internal components.

### 6.2 Battery Replacement

The Shelly BLU RC Button 4 is designed for a long battery life of up to 2 years. When the battery is low, you may receive a notification through the Shelly Smart Control app. To replace the battery:

1. Carefully open the device casing. Refer to the device's physical instructions for specific opening methods.
2. Remove the old battery.
3. Insert a new, compatible battery, ensuring correct polarity.
4. Securely close the device casing.

*Note: Always dispose of old batteries responsibly according to local regulations.*

## 7. TROUBLESHOOTING

If you encounter issues with your Shelly BLU RC Button 4, consider the following common solutions:

Problem	Possible Cause	Solution
Button not responding	Low or dead battery	Replace the battery.
Button not responding	Out of range of gateway	Move the button closer to the Shelly BLU Gateway or compatible Shelly device.
Button not responding	Gateway offline or disconnected	Check the status of your Shelly BLU Gateway or compatible Shelly device and ensure it is online and connected to your network.

Problem	Possible Cause	Solution
Actions not performing as expected	Incorrect configuration in app	Review and reconfigure the button actions within the Shelly Smart Control app. Ensure the correct devices or scenes are linked to each click combination.
Difficulty pairing	Interference or incorrect procedure	Ensure no other Bluetooth devices are interfering. Restart the pairing process in the Shelly Smart Control app. Ensure the button is in pairing mode.

If the problem persists, please refer to the [Warranty & Support](#) section for further assistance.

## 8. WARRANTY & SUPPORT

### 8.1 Product Warranty

The Shelly BLU RC Button 4 comes with a **2-year device warranty** from the date of purchase. This warranty covers manufacturing defects and ensures the product functions as intended under normal use. Please retain your proof of purchase for warranty claims.

### 8.2 Customer Support

Shelly provides comprehensive support for its products. If you require assistance, you can access the following resources:

- Knowledge Base:** Access product specifications and guidelines.
- Technical Support:** Contact Shelly's professional support team.
- Community Forums:** Engage with other users and find solutions on Facebook Support Groups and Reddit communities.
- Shelly Academy:** Explore video tutorials and webinars for in-depth guidance.
