TROUBLESHOOTING

Problem	Possible Cause	Solution
Machine not freezing / Slushie not forming	Beverage lacks sufficient sugar content; Ambient temperature too high; Insufficient freezing time.	Ensure beverage contains sugar (e.g., fruit juice, soda). Operate in a cooler environment. Allow the full recommended freezing time (at least 20 minutes).
Excessive noise during operation	Unit not on a stable, level surface; Internal components misaligned.	Ensure the machine is placed on a firm, level surface. If noise persists and is unusual, contact customer support.
Slushie not dispensing properly	Dispensing lever blocked; Slushie too thick.	Check for any blockages around the dispensing lever. If the slushie is too thick, allow it to soften slightly or adjust thickness settings for future batches.
